**ACTIVITY REPORT: Self Initiated Inspection**

N623554396

<b>FACILITY:</b> Arbor Resources LLC - Simpson T		<b>SRN / ID:</b> N6235
<b>LOCATION:</b> 6250 CUNNINGHAM RD, KALKASKA		<b>DISTRICT:</b> Cadillac
<b>CITY:</b> KALKASKA		<b>COUNTY:</b> KALKASKA
<b>CONTACT:</b>		<b>ACTIVITY DATE:</b> 07/29/2020
<b>STAFF:</b> Kurt Childs	<b>COMPLIANCE STATUS:</b>	<b>SOURCE CLASS:</b> SM OPT OUT
<b>SUBJECT:</b> PTI 103-97 Void Request.		
<b>RESOLVED COMPLAINTS:</b>		

A request to void PTI 103-97 dated July 1, 2020 was previously provided by email and a hard copy was received at the Cadillac District Office on July 15, 2020. This issue, along with MAERS submittal requirements were discussed through prior emails and a phone call with the company. The letter addresses the status of most of the equipment on site, but omitted the glycol dehydrator which is referenced in the PTI. The company was informed in a 7/14/2020 email that additional information regarding the status of the dehydrator was required before the PTI could be voided.

While in the area on 7/29/2020 I visited the site and observed the Waukesha Compressor engine (operating), storage tanks and line heater. The glycol dehydrator was still in place, had new plumbing installed and was pressurized, but the reboiler was not operating (see photo's). It appears the glycol dehydrator is in use or intended to be in use in some fashion. As a result, the PTI cannot be voided until the status of the glycol dehydrator is made clear.
