SUBJECT: Unannounced inspection of portable gravel crusher.		
RESOLVED COMPLAINTS:		

Facility: Associated Constructors Gravel Crusher PTI#382-99

Inspection Date: 8/15/2014

Compliance Status: In compliance

MDEQ-AQD Staff:

- Joseph Scanlan, EQA

Facility Representative:

- Dave Clement, Foreman

On 8/15/2014 I conducted an unannounced inspection of this portable gravel crusher. The crusher was located in Associated Constructor's yard located in Negaunee Township near the Midway Industrial Park. Mr. Clement had no copy of the permit on site.

It became apparent that there were some issues with the equipment numbering of the equipment on site and what was listed in the file for this particular PTI. In short, Associated Constructor's had recently purchased two crushers from Rod Wells. The SRN # on the relocation notification for this site was for the other crusher, which at the time of this inspection located at the Eagle Mine, about 30 miles north of Marquette.

I arranged a meeting with Mr. Pete Deux, project manager for Associated Constructors. Mr. Deux met with myself and AQD-EQA Mr. Joel Asher who was familiar with the crusher setups when R. Wells had ownership. Once the details of the R.Wells/Associated Constructors file discrepancies were clear, Mr. Deux promptly issued corrective actions. All equipment numbering was standardized and visible emission tests for all equipment were updated and submitted to the district office for filing.

This crusher facility is now in compliance.
