Re: Letter of Violation, Dated 10/8/21

Dear Mr. Scanlon

On our plant #5(N6717), we switched jaw crushers when the Empire Mine shut down. This jaw crusher (PC-9) was not easily portable due to height, so it was moved to the Tilden crushing site. PC-9 is similar in size to the crusher it replaced, PC-12 which was modified to the Tilden on 10/28/07. PC-9 was permitted at the Empire under 456-99 and permitting was done on 11/29/99. This exchange of jaws took place on 8/30/2017.

We did not realize a modification was required due to the size and production of the primary jaws being essentially identical.

Past precedence was that equipment on our general permits could be moved within all ALS PTI's without additional modifications. (See attached inspection for 113-99 5/28/2014)

Our permits are very old and have been modified numerous times. Would we be further ahead to renew our general permits with our current equipment? Or just send an updated drawing with equipment we are using?

We did find that a rental conveyor RTL-8 that was modified on 4/25/19, tested on 7/18/19 for plant # 83-99 was purchased and we changed the number once purchased to CV-65 but had not sent a letter to show this. See attached letter to acknowledge this.

We look forward to working together to resolve these issues.

Thank you

Reed Alderton, Crushing Superintendent

Permit Section, Air Quality Division
MI Dept of Environmental Quality
PO Box 30260
Lansing, MI 48909-7760

After review of our records these five pieces of equipment never had their rental numbers transferred to our standard ID#’s.

I am submitting this letter to inform you of the ID# changes for the following rental equipment permitted under #83-99 which were purchased:

RTL1 is now RS-30	VE reading 7/18/19
RTL2 is now CV-66	VE reading TBD
RTL3 is now CV-67	VE reading TBD
RTL4 is now CV-68	VE reading 7/18/19
RTL8 is now CV-65	VE reading 7/18/19

If you need any additional information, please do not hesitate to contact me.

Sincerely,

Reed Alderton
Crushing Superintendent

DEPARTMENT OF ENVIRONMENTAL QUALITY
 AIR QUALITY DIVISION
 ACTIVITY REPORT: Self Initiated Inspection

N671825275

FACILITY: A LINDBERG & SONS INC #113-99		SRN / ID: N6718
LOCATION: M-95 Gravel Pit T40N R30W Sec 5, IRON MOUNTAIN		DISTRICT: Upper Peninsula
CITY: IRON MOUNTAIN		COUNTY: DICKINSON
CONTACT: John Sicotte, Foreman		ACTIVITY DATE: 05/28/2014
STAFF: Joel Asher	COMPLIANCE STATUS: Compliance	SOURCE CLASS: MINOR
SUBJECT: Portable gravel crusher		
RESOLVED COMPLAINTS:		

On 5/28/2014 Mr. Joe Scanlan and I conducted an unannounced inspection of this portable gravel crusher. Our contact was the plant foreman, Mr. John Sicotte.

This crusher was operating at the M-95 pit located just north of Iron Mountain. Mr. Sicotte stated they started crushing at this location about 3 weeks ago and will remain here for another 3 weeks. So far they have crushed 8500 tons of 23A, 3100 tons of recycle asphalt, and 15,000 tons of 23. They plan to crush 20,000 tons of wash material and 5,000 tons of 2"-.

A water tank was observed onsite and spray bars were utilized to control fugitive emissions. Water is obtained from the holding pond in the pit.

Mr. Sicotte stated he has not received any new equipment for his crushing spread this year. A walk through of the spread was taken and the following equipment was observed to be in operation:

- jaw crusher PC8 48-99
- conveyor RS20 113-99
- screen deck SP18 113-99
- conveyor RS21 83-99
- conveyor CV71 419-99 / 113-99
- cone crusher CC13 48-99
- conveyor RS26 83-99
- conveyor CV62 419-99
- conveyor RS14 83-99
- radial stacker RS27 419-99

All equipment is permitted under PTI 113-99 or another of A Lindberg & Son's PTIs.

No violations of the Air Pollution Control Rules or PTI #113-99 were observed during this inspection
