

RECEIVED

JUL 12 2019

AIR QUALITY DIVISION  
GRAND RAPIDS DISTRICT

7/11/2019

Department of Environment, Great Lakes, and Energy (EGLE), Air Quality Division (AQD),

We received inspection on May 9, 2019 siting that the facility did not have current record of emissions on hand at time of inspection and that we were required by state law to provide as well as maintain these records.

Our roasting process from previous inspections have not changed in conjunction with the information provided previously.

Magnum Coffee Roastery is beginning a capitol project July 15<sup>th</sup> to replace existing roasters, stacks, burn boxes, loading stations, recirc piping, afterburner and chaff containment units. This project will reduce the volumes of emissions produced by the facility.

We will be able to evaluate this process after the roasters are running and commissioned by the contractors. Installation should be an 8-12-week process.

Thank you,

A handwritten signature in black ink, appearing to read 'Tanner K. Hubert'.
