April 6<sup>th</sup> 2016

Dear, Mr. Lane

Per the violation notice Rosler Metal Finishing USA received March 28th, I am submitting this letter as documentation referring to the actions being taken concerning this violation.

The rule/permit condition violated : PTI No. 27-11, Condition II.3. SRN: N7321, Calhoun County

The dates the violation occurred:

3/5/15	Batch #304	4,538 lbs initial wt.	947 lbs urethane	20.9%
3/9/15	Batch #305	4,248 lbs initial wt.	1,206 lbs urethane	28.4%
8/24/15	Batch #807	4,781 lbs initial wt.	1,224 lbs urethane	25.6%
10/16/15	Batch #1007	3,534 lbs initial wt.	889 lbs urethane	25.2%
10/29/15	Batch #1012	2,226 lbs initial wt.	986 lbs urethane	44.3%

Rosler Metal Finishing USA will revisit training of its oven operators to limit the size of the oven loads in order to stay compliant in the future. Each time, there were days available both before and after the date of the high load in which we could have split the load and not exceeded the 878 lbs. This will be corrected with proper training for each oven operator on a yearly basis.

If you need additional information concerning this violation please contact me.

Sincerely

Lane Brumm
