To whom it may concern,

In the spring of 2016 our crematory, Genesee Cremation Center Inc., cremated a small bag of pharmaceuticals for a local police department. Upon reading over the installation permit for our new retort that year, I realized we were only allowed to cremate human pathological waste. I then contacted the local police department and informed them that we would no longer be able to provide them with that service. We have not cremated anything other than human pathological waste since that time.

We were also informed by Dan McGeen when he visited that a particulate filter and log sheet for spray paint usage was required in our paint booth. I have install a particulate filter over the exhaust fan and have created a log sheet to inventory the number of cans of spray paint used each month.

Thank You

Dustin Rice
