RESOLVED COMPLAINTS:		

Inspected this source with respect to Permit to Install 88-07. This source has not been inspected previously. This is a very small fuel oil fired incinerator, commercially made, with afterburner control. It was not in use at the time of the inspection. The owner of the unit indicated it had not been in use in the last 12 months and there is no plans to use it. I provided him with instructions on how to void the permit should he wish to. No further action is recommended.
