SUBJECT: Odor Survey.		
RESOLVED COMPLAINTS: C-14-01320		

I conducted an odor survey of the area around Grand Traverse Fruit (GTF) after receiving an odor complaint (attached) the previous day. Winds were from the south at around 5 mph. The air temperature was 60 degrees F and skies were clear. I proceeded north on Monroe Rd. from Angell Rd. and stopped just north of the GTF plant. I could barely detect mild sewage type odors at this location (see attached map). The second location was in the drive to the oil well north of the GTF plant. No odors were detected here. I also stopped on Gay Rd. directly north (downwind) of the plant and did not detect any odors. Based on the wind speed and direction these were the only odor survey points that were necessary. As a result of this survey I could not verify the complaint received on the previous day.
