RE: RESPONSE TO VIOLATION NOTICE

During an inspection from the Department of Environmental Quality, Air Quality Division on May 25, 2016, sited William Dickerson Trucking, Inc. a violation due to the failure of not having company ID numbers labeled on crushing equipment.

As required by the Special Use Condition 1.7 of permit to install No.46-08, all equipment required be labeled with company ID numbers were placed when the permit was approved and issued on March 13, 2008. From that day forward, company employees did not observe that the labels were missing due to years of outside exposure. On June 7th, 2016 the numbers are replaced with permanent paint to ensure we continue to stay in compliance.

William Dickerson Trucking, Inc.
