Dear Ron Caldwell:

VIOLATION NOTICE

On August 7, 2024, the Department of Environment, Great Lakes, and Energy (EGLE), Air Quality Division (AQD), conducted a complaint investigation of ReConserve of Michigan, Inc. located at 170 Angell Street, Battle Creek, Michigan. The purpose of this investigation was to determine ReConserve of Michigan, Inc. compliance with the requirements of the federal Clean Air Act; Part 55, Air Pollution Control, of the Natural Resources and Environmental Protection Act, 1994 PA 451, as amended (Act 451); the Air Pollution Control Rules; the conditions of Permit to Install (PTI) number 184-08B; Administrative Consent Order (ACO) AQD No. 2024-09; and to investigate recent complaints which we received on July 26, 2024, and August 7, 2024, regarding fugitive dust attributed to ReConserve of Michigan, Inc. operations.

During the investigation, staff observed the following:

Process Description	Rule/Permit Condition Violated	Comments
RTO Filter box attached to EU-DRYING.	R 336.1901 (Rule 901), General Condition 6 of PTI #184-08B, and ACO AQD No. 2024-09	Excessive amount of particulate matter accumulation on and around filter box, which is located outside. Material appears to be the same as what was found on the complainant's vehicles.
EU-DRYING.	Special Condition III.2 of PTI #184-08B	Dusty waste filter material was observed near the filter box in an open container, which was exposed to the outside ambient air.

In the professional judgment of AQD staff, the dust fallout that was observed was of sufficient intensity, frequency and duration so as to constitute a violation of Rule 901 of the administrative rules promulgated under Act 451 and PTI number 184-08B.

The AQD staff observed fallout accumulation on multiple vehicles at a neighboring business parking lot.
