Re: Violation Notice; dated 09/30/16

Dear David,

On September 20, 2016, you inspected our plant and found we were in violation of Rule 201; not maintaining monthly records demonstrating compliance with the Rule 287(d) permit exemption since April 15, 2015. The employee responsible for maintaining these records left our employ and was never allocated to another employee.

Since your visit on September 20, 2016, we have kept accurate records for our daily usage and will continue to maintain compliance with Rule 287(d) moving forward. We have appointed two employees with this task in order to be compliance in the future.

Thank you.

John L. Stovall
