Samantha Braman, 517-282-1373, bramans1@michigan.gov

Process Description:

General permit for TFR/SVE and AS remediation of a petroleum impacted site issued July 25th 2014. I have been in contact with the environmental consultants managing this site. Upon requesting to do an inspection of the equipment I learned that this system is not currently in place.

Tom Timmermans, Sr. Project Manager with SES Environmental stated in an email that "... we applied for an air permit while planning the remediation system. The system was never installed. Before we installed the remediation system the decision was made to go for a restricted closure leaving the contamination in place."

Upon request from Tom Sampson of SES Environmental, I will be requesting to void General Permit No. 94-14.

Email correspondence attached to the paper copy of this report.
