Re: Port City Architectural Signage. June 5, 2019 Violation Notice

Dear Mr. Grinstern:

Port City Architectural Signage (SRN: P0542) located at 2350 South Getty Street, Muskegon, MI has requested Regulatory Compliance Specialists, Inc. (RCSI) assist them to address your June 5, 2019 Violation Notice. The Violation Notice stated that the facility failed to obtain an Air Use Permit-To-Install prior to installation.

Based on the Violation Notice, the following processes were reviewed to determine if the facility is exempt from the requirement to obtain an air use permit due to equipment and process exemptions.

- 2 - 30-ton Sand Silos
- 1 - 125 lb./hr. Sand Mixer
- 1 - Mold making operation
- 3 - Crucible furnaces
- 1 - Pouring/Cooling/Knockout (Shakeout) operation

I have reviewed the amount of molten aluminum and bronze produced by the facility in 2018 and estimated the amount of air emissions that could be expected to be emitted by the processes. Based on this review, the processes at Port City Architectural Signage (SRN PO542) appear to be exempt from the requirement to apply for an Air Use Permit To Install. Please review the calculations and conclusions enclosed and contact me if you have any questions.

Thank you for your time and consideration.

Sincerely,

A handwritten signature in black ink, appearing to read "William H. Hilton".
