 AIR QUALITY DIVISION
 ACTIVITY REPORT: Self Initiated Inspection

P059331907

FACILITY: ENERGY POWER SYSTEMS, LLC		SRN / ID: P0593
LOCATION: 601 STEPHENSON HIGHWAY, TROY		DISTRICT: Southeast Michigan
CITY: TROY		COUNTY: OAKLAND
CONTACT: Brooks Lamb Budny , EHS Manager		ACTIVITY DATE: 10/22/2015
STAFF: Sebastian Kallumkal	COMPLIANCE STATUS: Compliance	SOURCE CLASS: MINOR
SUBJECT: Onsite inspection		
RESOLVED COMPLAINTS:		

On Thursday, October 22, 2015, I conducted a self-initiated inspection at Energy Power Systems, LLC., located at 601 Stephenson Highway, Troy, Michigan. The purpose of the inspection was to verify that the processes regulated under PTI No. 29-15 are removed from the site and the PTI can be voided. On October 13, 2015, AQD received facility's request to void PTI No. 29-15 because the operations covered under this permit were move out to a new location in Pontiac, Michigan.

I arrived at the facility at about 10:00 AM. I met Ms. Brooks Lamb-Budny, Manager, Product and Process Quality Assurance. I introduced myself and stated the purpose of our visit. She told me that the 601 Stephenson Highway building is already sold and all the equipment are moved out. She accompanied me into the building. I observed that all the process equipment were removed except a wastewater evaporator which they may use to evaporate the floor wash water. This building will be vacated and all processes removed completed by October 31, 2015. The evaporator is a part of the PTI No. 29-15, so I requested Ms. Budny to inform AQD after the evaporator is relocated to void the permit.

The 711 Stephenson Highway building (the office building) is still occupied but will be vacated by October 31.

Conclusion: The permit will be voided after all equipment are removed from the site.
