SUBJECT: Unannounced Self-initiated Inspection		
RESOLVED COMPLAINTS:		

On 8/26/2015, I conducted a level 2 unannounced target inspection at Zero Tolerance, LLC located at 33419 Kelly Road, Fraser, Michigan 48026. The purpose of the inspection was to determine the facility's compliance with the requirements of the federal Clean Air Act; Part 55, Air Pollution Control, of the Natural Resources and Environmental Protection Act, 1994 PA 451, as amended (Act 451), and the administrative rules. During the pre-inspection meeting, I initially showed my credential (ID Badge), stated the purpose of my visit, and gave a copy of the pamphlet "Environmental Inspections: Rights and Responsibilities", to Mr. Steve Michon, President.

During the inspection, I was informed that the facility's primary business is building plastic injection molds for various customers. The job starts with computer CAD/CAM work to design and conceptualize the mold then to engineer, develop, and build the mold per customer specifications. During the walk through inspection, I observed a total of 4 small CNC machines and other cutting, grinding, and machining equipment exempt from permit to install requirements per AQD Administrative Rule R 336.1285(I)(vi). All equipment process emissions are released indoors. I did not observe any visible emissions inside and outside the facility during inspection.

Overall, I did not find any noncompliance issues during the inspection.
