AIR QUALITY DIVISION
ACTIVITY REPORT: Scheduled Inspection

P069238825

FACILITY: CODE ELECTRICAL, INC.		SRN / ID: P0692
LOCATION: 1301 DIVISION STREET, MARQUETTE		DISTRICT: Upper Peninsula
CITY: MARQUETTE		COUNTY: MARQUETTE
CONTACT: Diana Rautio, V.P.		ACTIVITY DATE: 03/06/2017
STAFF: Ed Lancaster	COMPLIANCE STATUS: Compliance	SOURCE CLASS:
SUBJECT: Unannounced, scheduled inspection.		
RESOLVED COMPLAINTS:		

Code Electrical is a full service electrical contractor, located in a commercial/residential area in the City of Marquette.

A few years ago the company purchased a fluorescent bulb crusher, to properly dispose of the bulbs that are generated as part of their business. Unfortunately, they were not informed by the bulb crusher salesperson an air use permit was required. When I became aware they were operating the crusher and informed them of the requirement to obtain a permit for the unit, they immediately submitted a permit application.

Because of the potential for mercury vapor release into the ambient environment the setback requirements for operating a bulb crusher near a residential area are strict and additional controls need to be added to the unit to protect the health and safety of the residents and environment. Code Electrical was not able to meet those requirements and decided to sell the unit and pursue alternative disposal options.

My inspection on 6 March 2017 was to confirm the unit was no longer being used. Upon arriving at Code Electrical I met with Ms. Diana Rautio, V.P. She informed me they did sell the unit shortly after my inspection last year, around April 2016.

At this time, the company is in compliance with the Air Pollution Control Rules and there is no need for any future follow-up inspections of this source.
