State of Michigan  
Department of Environmental Quality  
Southeast Michigan District Office  
27700 Donald Court  
Warren, MI 48092-2793

To Whom It May Concern:

On April 28, 2016, the Department of Environmental Quality (DEQ), Air Quality Division (AQD), conducted an inspection of Peters Indoor Range & Gun Shop, Inc. At that time, Iranna Konanahalli, Senior Environmental Engineer, informed me that he would be sending me a letter detailing the results of the inspection. On May 5, 2016, I received a letter from Mr. Konanahalli that provided a description of an alleged violation regarding Rule 201 pursuant to Rule 285 (cc) which requires HEPA filters, preferably HEPA class H14/U15 or better, for exhaust gases from the shooting range.

I recently acquired Peters Indoor Range & Gun Shop, Inc. in March of 2016 and was unaware of Rule 201 or Rule 285. I first became aware of an alleged violation during the inspection performed by Mr. Konanahalli on April 28, 2016. I immediately contacted Astro Heating & Cooling and provided them with a copy of the letter to determine the next steps needed to correct the alleged violation. I was informed that a new exhaust system was necessary to maximize the effectiveness of the HEPA class H14/U15 filters. I expect to have the new exhaust system installed and operational with the appropriate HEPA class H14/U15 filters within 90 days of this letter, August 21, 2016. With the installation of the new filters, the gun range will be operating under the Rule 201 permitting exemption, Rule 285 (cc).

Sincerely,

Robert W. Peters  
President and Owner  
Peters Indoor Range & Gun Shop, Inc.
