**Subject:** Response to Violation Notice  
Ashley Land Development Co. – SRN P0734

The Violation Notice (VN) dated July 8, 2019 was erroneously sent to Ashley Land Development Co. (ALDC), when it should have been sent to AWH Grading, LLC (AWH). The gravel pit is owned by ALDC, but the non-metallic mineral crushing plant is owned and operated by AWH. AWH is submitting this Response to the Violation Notice from the Michigan Department of Environment, Great Lakes and Energy (EGLE) dated July 8, 2019. The VN was issued for operation of a non-metallic mineral processing plant without an updated General Permit to Install. The VN requires a written response be submitted to the EGLE-AQD prior to July 29, 2019.

AWH installed a new jaw crusher (Terex Finlay J-1175E) and associated equipment and did not obtain a new General PTI. AWH was unaware of the requirement of Rule 201 to obtain a PTI prior to installation and operation. This has been an ongoing violation since installation.

AWH has contracted Impact Compliance & Testing, Inc. (ICT, formerly Derenzo Environmental Services) to complete a General PTI modification and associated support materials for the updated process equipment. The completed documents are attached to this correspondence.

AWH looks forward to the approval and issuance of a General PTI, which will resolve the issued VN. Should you have any questions, please contact us at (248) 684-1260 or ICT at (517) 268-0043.

Sincerely,

AWH GRADING, LLC

Adam Hayes  
Owner
