VIOLATION NOTICE RESPONSE

Dear David,

This letter is in response to the violation that we received on March 28th 2023 and to show how Precise Finishing Systems is working towards being in compliance with the requirements of the federal Clean Air Act; Part 55, Air Pollution Control, of the Natural Resources and Environmental Protection Act, 1994 PA 451, as amended (Act 451); the Air Pollution Control Rules; and the conditions of Permit to Install (PTI) number 47-17; Condition VI 1 & 2. As well as Rule R336.1287(2)(c) record keeping for a paint booth.

The violations in question are listed below:

Process Description	Rule/Permit Condition Violated	Comments
Electropolish Dip Tanks	Condition VI. 1 & 2. Record Keeping	Facility had no monthly records of chemical usage.
Paint booth	R336.1287(2) (c) (iii) records for paint booth.	Facility has no monthly records for paint booth usage.
EU-ElectPol	Condition II. 1 & 2. Material Limits	Facility shows purchase records of more gallons than allowable under PTI 47-17

After we received our violation on March 28th, we immediately started tracking both paint booth and chemical usage. Both of these documents have been provided to the EGLE and will continue to submit usage sheets on a bi-monthly basis until it is established that we are keeping accurate/consistent records.

Precise Finishing Systems
1650 N. Burkhart Rd.
Howell, MI 48855
517.552.9200

In regards to our violation of using more gallons than allowable under PTI 47-17, I have reached out to the permit section to increase our limit so we don't fall into violation again. If we are unable to obtain a new permit before the end of the fiscal year, then we will not exceed our 700 gallon limit, and will wait until January when our allowance resets.

Thank you for working with us to get back into compliance.

Sincerely,

Blake Barber
Operations Supervisor
