**Dear Sir/Madame:**

In response to the recent cited violation, the crushing equipment was inoperable from March 2021 to July 2022, while awaiting service assistance. Per the complaint of July 6, 2022, ASI Equipment Company was repairing the machine for the opacity testing. The only material created was for the repairman. There was no quantitative material produced, which is the current condition.

Burnash Wrecking Inc., has hired ASTI, 10448 Citation Dr., Brighton, MI, to perform the upcoming opacity testing and will give notice to EGLE in the event of moving the equipment.

The machine is currently in our yard awaiting scheduling by ASTI and EGLE for an opacity test. We are not processing any material until opacity test is completed and approved. The crusher and screener are now repaired and waiting for test as agreed. For questions contact Bruce at ASTI (616)485-3832 or Martin at Burnash Wrecking (810)516-5172.

**Sincerely,**

A handwritten signature in black ink that reads "M. Burnash". The signature is written in a cursive, flowing style.

**Martin Burnash**
