STAFF: Joseph Jaskowski	COMPLIANCE STATUS: Compliance	SOURCE CLASS: MINOR
SUBJECT: Annual Inspection.		
RESOLVED COMPLAINTS:		

On October 11, 2022 EGLE AQD staff Robert Elmouchi and I (Joe Jaskowski) conducted an unannounced inspection of Contour Development, LLC. (P1247) located at 21500 Northwestern Highway, Southfield, Michigan. The purpose of the inspection was to determine the company's compliance with the requirements of the Federal Clean Air Act; Part 55, Air Pollution Control, of the Natural Resources and Environmental Protection Act, 1994 PA 451, as amended (Act 451); the Air Pollution Control Rules; and the conditions of the Permit to Install (PTI) No. 111-21.

Upon arrival at the site, we introduced ourselves to Mr. David Yankle (Construction Superintendent) who proceeded to show us around. Mr. Yankle called Mr. Anthony Erebor (Records Contact) to also accompany us around the facility. Mr. Erebor e-mailed staff a copy of the watering and maintenance, and daily, monthly and annual throughput records.

No visible emissions were observed during the inspection as the facility was not operating. Staff noted water sprayers on the crusher and screen, and a water truck on-site. Facility staff confirmed use of the water truck as a source of water for the sprayers and to wet down the roadways when needed. The drop distance to the pile appeared to be minimized, and no opacity was noted at the material storage piles.

The company has complied with the PTI requirement to install a belt scale, which was installed on August 30, 2022. The company appears to be keeping all required records which shows that the material processed is below the 100,000 ton limit per 12- month rolling average.

As a result of the inspection, it was determined that Contour Development LLC, is in compliance with PTI No. 111-21.
