Dear Lisa Carroll:

**VIOLATION NOTICE**

On June 2, 2022, the Department of Environment, Great Lakes, and Energy (EGLE), Air Quality Division (AQD), conducted an investigation in response to complaints of nuisance odors received that day alleged to be the result of operations at Ferrous Processing & Trading Company, located at 3651 Wyoming Ave., Dearborn, Michigan. The purpose of this inspection was to determine Ferrous Processing & Trading Company's compliance with the requirements of the federal Clean Air Act; Part 55, Air Pollution Control, of the Natural Resources and Environmental Protection Act, 1994 PA 451, as amended (Act 451); and the Air Pollution Control Rules.

Two separate investigations were performed by Jonathan Lamb of the AQD on June 2, 2022; the investigations were performed from approximately 6:00 PM to 6:40 PM and 11:05 PM to 11:35 PM. During each of these investigations, the following violation was observed:

Process Description	Rule/Permit Condition Violated	Comments
Material storage piles	R 336.1901(b)	Persistent and objectionable odors of moderate to strong intensity (Level 3 and 4) observed emitting from the facility and impacting nearby neighborhoods.

During each investigation performed on June 2, 2022, AQD staff observed persistent and objectionable odors of moderate to strong intensity (Level 3 and 4) impacting residential areas downwind of the facility which were determined to be emitting from Ferrous Processing & Trading Company. In AQD staff's professional judgement, the odors observed were of sufficient intensity, duration, and frequency to constitute a violation of Rule 901(b): an "unreasonable interference with the comfortable enjoyment of life and property."
