SUBJECT: Annual Inspection.		
RESOLVED COMPLAINTS:		

On July 18, 2024, EGLE AQD staff Joe Jaskowski conducted a scheduled inspection of Crusher Brothers LLC (SRN: P1391) located at 600 N. Saginaw Street, Pontiac, Michigan. The purpose of the inspection was to determine the company's compliance with the requirements of the Federal Clean Air Act; Part 55, Air Pollution Control, of the Natural Resources and Environmental Protection Act, 1994 PA 451, as amended (Act 451); the Air Pollution Control Rules; and the conditions of the Permit to Install (PTI) No 104-23.

Upon arrival at the site, I noted that the crusher was not being operated. I phoned Kent Pass (Owner) who was not on-site. Mr. Pass stated the crusher had not been used since March 28, 2024, and was down for repairs. He also stated that they were in talks with the City of Pontiac regarding their zoning and were awaiting approval to begin operating.

The plant was not in operation at the time of the inspection, and it is uncertain if they will continue operation; therefore I could not verify if the crusher operation is in compliance with the permit conditions. However, the company was issued first and second violation notices for failure to submit their 2023 Annual Emissions Report in MiEnviro.
