On March 17, 2015, AQD staff, Erik Gurshaw, conducted a self-initiated, unannounced inspection at Capital Sales Company located at 1471 E. Nine Mile Road in Hazel Park, Michigan. The purpose of the inspection was to determine compliance with the Federal Clean Air Act; Article II, Part 55, Air Pollution Control of Natural Resources and Environmental Protection Act, 1994 Public Act 451; and Michigan Department of Environmental Quality, Air Quality Division (MDEQ-AQD) Rules.

Upon arriving at the facility, AQD staff introduced themselves and stated the purpose of the visit to Mr. Sam Haddad, Owner. Mr. Haddad indicated that Capital Sales Company is a wholesale distributor of packaged candy and groceries. The building consists entirely of office space, a retail area, and warehouse space. The facility is open Monday through Friday from 7:00 AM until 4:00 PM and 20 people are employed at the location. Mr. Haddad assisted AQD staff during the inspection.

The company recently purchased a natural gas fired Kohler Model 100REZGD 60 Hz, 100 kW emergency generator. Mr. Haddad said that he purchased the generator because of the high frequency of power outages at the location. The emergency generator is subject to MACT Subpart ZZZZ for reciprocating internal combustion engines, but the AQD has not accepted delegation at area sources of hazardous air pollutant emissions.

Based on this inspection, it was determined that Capital Sales Company is in compliance with all applicable air rules and regulations.
