

NOTICE of AIR PERMIT COMMENT PERIOD and PUBLIC HEARING

The Michigan Department of Environment, Great Lakes, and Energy (EGLE) is holding a public comment period and virtual public hearing to allow the public the opportunity to comment on the proposed conditional approval of air permits.

There is a public comment period from August 5, 2020, until September 18, 2020, and a virtual public hearing on September 9, 2020 for:

Company: Two FCA US, LLC (FCA) facilities - Detroit Assembly Complex Mack Plant (Mack), located at 4000 Saint Jean Street and Jefferson North Assembly Plant (JNAP) located at 2101 Conner Street, Detroit, Michigan.

What FCA wants to do: Permit to Install (PTI) Application No. 14-19A is for modifications to a previously permitted automotive assembly line at Mack. PTI Application No. 33-20 is for the proposed installation of a new coating line and changes to existing equipment at JNAP.

- The Mack proposal is subject to the state and federal Non-Attainment New Source Review rules and regulations for a major modification to an existing major stationary source based on the expected significant net emission increase in volatile organic compounds, which are a precursor for ozone.
- A preliminary determination shows that the proposed requests will not violate any of EGLE's rules nor the National Ambient Air Quality Standards. The facilities' impacts will not exceed the available increments for nitrogen oxides and particulate matter less than 2.5 microns.
- Both requests require modification to Renewable Operating Permit (ROP) No. MI-ROP-N2155-2017 (SRN N2155). This public comment period meets the public participation requirements for a future administrative amendment to the ROP.
