

## NOTICE of AIR PERMIT COMMENT PERIOD and PUBLIC HEARING

The Michigan Department of Environment, Great Lakes, and Energy (EGLE) is holding a public comment period and virtual public hearing to allow the public the opportunity to comment on the proposed conditional approval of an air permit.

**Public comment period from February 10, 2021, to March 22, 2021, with a virtual public hearing on March 16, 2021 for:**

**Company:** FCA US, LLC (FCA) - Jefferson North Assembly Plant (JNAP) located at 2101 Conner Street, Detroit, Michigan.

**What FCA wants to do:** PTI Application No. 33-20 is for the proposed installation of a new coating line and changes to existing equipment at JNAP. **This application originally went through public comment in 2020. This second public comment period is necessary because FCA has proposed changes to the application.** Changes made to the draft permit are:

1. The addition of updated conditions for four existing emission units.
2. Additional recordkeeping and reporting requirements.
3. To allow 12 months after installation for the average amount of volatile organic compounds per job to decrease from the current 4.8 pounds per job to 4.4.

It has been preliminarily determined the proposed request will not violate EGLE's rules nor the National Ambient Air Quality Standards. The facility's impact will not exceed the available increments for nitrogen oxides, particulate matter less than 10 microns, and particulate matter less than 2.5 microns.

- This request requires a modification to Renewable Operating Permit (ROP) No. MI-ROP-N2155-2017 (SRN N2155). This public comment period meets the public participation requirements for a future administrative amendment to the ROP.
