

NOTICE of EXTENDED AIR PERMIT COMMENT PERIOD and PUBLIC HEARING

The Michigan Department of Environment, Great Lakes, and Energy (EGLE) has extended a public comment period and a public hearing to allow the public the opportunity to comment on the proposed conditional approval of an air permit.

The public comment period began on June 12, and has been extended to September 9, 2024 with a hybrid public hearing on September 5 for:

Company: FCA US LLC – Detroit Assembly Complex – Mack (FCA) located at 4000 Saint Jean Street, Detroit, Michigan

What FCA wants to do: Application No. [APP-2022-0125](#) is to modify their current [Permit to Install 14-19A](#) to add requirements for the continued operation of a second air pollution control device called a regenerative thermal oxidizer (RTO2) and increasing particulate matter emission limits.

Technical details: The public comment period remains open, and the public hearing has been rescheduled to September 5. The public comment period and public hearing are to allow all interested parties the opportunity to comment on the proposed permit. It has been preliminarily determined that the installation of new equipment and other permit modifications will not violate any of EGLE's rules nor the National Ambient Air Quality Standards. The facility's impact will not exceed the available increments for nitrogen oxides, particulate matter less than or equal to ten microns in diameter, and particulate matter less than or equal to 2.5 microns in diameter.

Additionally, the installation of new equipment and permit modifications will require revisions to Renewable Operating Permit (ROP) No. [MI-ROP-N2155-2017](#). This public comment period meets the public participation requirements for a future administrative amendment to the ROP.

Provide comment in any of these ways by September 9, 2024:
