

GRETCHEN WHITMER
GOVERNOR

STATE OF MICHIGAN
DEPARTMENT OF
ENVIRONMENT, GREAT LAKES, AND ENERGY
LANSING

PHILLIP D. ROOS
DIRECTOR

October 29, 2024

Dear Interested Party:

Thank you for your interest regarding the Permit to Install (PTI) Application No. APP-2024-0037 submitted by Neogen Corporation, to the Michigan Department of Environment, Great Lakes, and Energy (EGLE), requesting installation of a food safety manufacturing facility, located at 720 East Shiawassee Street in Lansing, Michigan.

Pursuant to state and federal requirements, EGLE held a public comment period that ended on October 18, 2024, on its proposed conditional approval of the permit. The Air Quality Division (AQD) received no written comments during the public comment period.

After careful consideration of the issues and pursuant to the delegation of authority from the Director of EGLE, I have approved PTI No. 120-24 with modifications made to the proposed permit.

During the public comment period, a typographical error and two administrative errors were found. Also, two clarifying items were added to the permit.

- The typographical error was found in Special Condition (SC) V.1 for FGNESHAPO of the proposed conditions. The error stated the permittee “much” and it was changed to the permittee “must.”
- One administrative error was in SC VI.6(a) for FGNESHAPO. This condition is for facilities that use less than 100 lb/year of ethylene oxide (EtO), and the facility will be using more than 100 lb/year of EtO. Therefore, that condition is not applicable to the facility and was removed from the permit.
- The other administrative error was omitting R 336.1940 as an underlying applicable requirement (UAR) to the special conditions. This UAR was added to all the conditions within FGNESHAPO.
- One clarifying item added to the permit were including the U.S. Environmental Protection Agency’s (USEPA) group 1 air emissions and group 2 air emissions in the definition of FGNESHAPO.
- The other clarifying item was including “A device to measure the facial velocity air through all natural draft openings in the enclosure” and “A device to measure the pressure drop across the enclosure” to SC IV.5(b) and (c), SC IV.6(b) and (c), and SC IV.7(b) and (c) in FGCOATING.
