

April 13, 2022

Brad Myott, District Supervisor
Michigan Department of Environment, Great Lakes, and Energy
Air Quality Division – Lansing District
Constitution Hall, 1 South
525 West Allegan St.
Lansing, MI 48933

**Subject: General Motors LLC – Lansing Grand River Assembly
Renewal Application for ROP No. MI-ROP-A1641-2017**

Dear Mr. Myott:

General Motors LLC – Lansing Grand River Assembly in Lansing, Michigan operates under the Title V Permit No. MI-ROP-A1641-2017 and is submitting the enclosed Renewable Operating Permit renewal application. This administratively complete application includes the following documents:

1. Renewal Application Form EQP6000
2. Additional Information Forms (EQP5774) – AI-FG-OLD, AI-Part C8/C9, AI-Part H12, AI-Part H13, and AI-Part H16
3. ROP Mark-up
4. FG-MACT IIII Work Practice Plan
5. CAM Plan

Based on information and belief formed after reasonable inquiry, I certify that the statements and information contained in this document are true, accurate and complete.

Should you have any questions or need additional information, please contact either Jeff Hummel (jeffrey.hummel@gm.com) or Brent Cousino (brent.cousino@gm.com).

Sincerely,

Jennifer Bigelow
Plant Director
GM Lansing Grand River Assembly

cc: EGLE-ROP@michigan.gov

Enclosures

RENEWABLE OPERATING PERMIT RENEWAL APPLICATION FORM

This information is required by Article II, Chapter 1, Part 55 (Air Pollution Control) of P.A. 451 of 1994, as amended, and the Federal Clean Air Act of 1990. Failure to obtain a permit required by Part 55 may result in penalties and/or imprisonment. Refer to instructions for additional information to complete the Renewable Operating Permit Renewal Application Form.

GENERAL INSTRUCTIONS

This application form should be submitted as part of an administratively complete application package for renewal of a Renewable Operating Permit (ROP). This application form consists of nine parts. Parts A – H must be completed for all applications and must also be completed for each section of a sectioned ROP. Answer all questions in all parts of the form unless directed otherwise. Detailed instructions for this application form can be found at <http://michigan.gov/air> (select the Permits Tab, "Renewable Operating Permits (ROP)/Title V", then "ROP Forms & Templates").

PART A: GENERAL INFORMATION

Enter information about the source, owner, contact person and the responsible official.

SOURCE INFORMATION

SRN A1641	SIC Code 3711	NAICS Code 336111	Existing ROP Number MI-ROP-A1641-2017	Section Number (if applicable)
Source Name General Motors LLC – Lansing Grand River Assembly				
Street Address 920 Townsend Street				
City Lansing	State MI	ZIP Code 48933	County Ingham	
Section/Town/Range (if address not available)				
Source Description Automobile Manufacturing Facility				
<input checked="" type="checkbox"/> Check here if any of the above information is different than what appears in the existing ROP. Identify any changes on the marked-up copy of your existing ROP.				

OWNER INFORMATION

Owner Name General Motors LLC				Section Number (if applicable)
Mailing address (<input type="checkbox"/> check if same as source address) 100 Renaissance Center				
City Detroit	State MI	ZIP Code 48243	County Wayne	Country USA

Check here if any information in this ROP renewal application is confidential. Confidential information should be identified on an Additional Information (AI-001) Form.

PART A: GENERAL INFORMATION (continued)

At least one contact and responsible official must be identified. Additional contacts and responsible officials may be included if necessary.

PART B: APPLICATION SUBMITTAL and CERTIFICATION by Responsible Official

Identify the items that are included as part of your administratively complete application in the checklist below. For your application to be complete, it must include information necessary to evaluate the source and to determine all applicable requirements. Answer the compliance statements as they pertain to all the applicable requirements to which the source is subject. The source's Responsible Official must sign and date this form.

Listing of ROP Application Contents. Check the box for the items included with your application.	
<input checked="" type="checkbox"/> Completed ROP Renewal Application Form (and any AI-001 Forms) (required)	<input type="checkbox"/> Compliance Plan/Schedule of Compliance
<input checked="" type="checkbox"/> Mark-up copy of existing ROP using official version from the AQD website (required)	<input type="checkbox"/> Stack information
<input type="checkbox"/> Copies of all Permit(s) to Install (PTIs) that have not been incorporated into existing ROP (required)	<input type="checkbox"/> Acid Rain Permit Initial/Renewal Application
<input type="checkbox"/> Criteria Pollutant/Hazardous Air Pollutant (HAP) Potential to Emit Calculations	<input type="checkbox"/> Cross-State Air Pollution Rule (CSAPR) Information
<input type="checkbox"/> MAERS Forms (to report emissions not previously submitted)	<input type="checkbox"/> Confidential Information
<input type="checkbox"/> Copies of all Consent Order/Consent Judgments that have not been incorporated into existing ROP	<input checked="" type="checkbox"/> Paper copy of all documentation provided (required)
<input checked="" type="checkbox"/> Compliance Assurance Monitoring (CAM) Plan	<input checked="" type="checkbox"/> Electronic documents provided (optional)
<input checked="" type="checkbox"/> Other Plans (e.g., Malfunction Abatement, Fugitive Dust, Operation and Maintenance, etc.)	<input type="checkbox"/> Other, explain:

Compliance Statement	
This source is in compliance with all of its applicable requirements, including those contained in the existing ROP, Permits to Install that have not yet been incorporated into that ROP, and other applicable requirements not currently contained in the existing ROP.	<input checked="" type="checkbox"/> Yes <input type="checkbox"/> No
This source will continue to be in compliance with all of its applicable requirements, including those contained in the existing ROP, Permits to Install that have not yet been incorporated into that ROP, and other applicable requirements not currently contained in the existing ROP.	<input checked="" type="checkbox"/> Yes <input type="checkbox"/> No
This source will meet in a timely manner applicable requirements that become effective during the permit term.	<input checked="" type="checkbox"/> Yes <input type="checkbox"/> No
The method(s) used to determine compliance for each applicable requirement is/are the method(s) specified in the existing ROP, Permits to Install that have not yet been incorporated into that ROP, and all other applicable requirements not currently contained in the existing ROP.	
If any of the above are checked No, identify the emission unit(s) or flexible group(s) affected and the specific condition number(s) or applicable requirement for which the source is or will be out of compliance at the time of issuance of the ROP renewal on an AI-001 Form. Provide a compliance plan and schedule of compliance on an AI-001 Form.	

Name and Title of the Responsible Official (Print or Type)	
Jennifer Bigelow, Plant Director	
<i>As a Responsible Official, I certify that, based on information and belief formed after reasonable inquiry, the statements and information in this application are true, accurate, and complete.</i>	
 Signature of Responsible Official	4/13/22 Date

PART C: SOURCE REQUIREMENT INFORMATION

Answer the questions below for specific requirements or programs to which the source may be subject.

C1.	Actual emissions and associated data from all emission units with applicable requirements (including those identified in the existing ROP, Permits to Install and other equipment that have not yet been incorporated into the ROP) are required to be reported in MAERS. Are there any emissions and associated data that have not been reported in MAERS for the most recent emissions reporting year? If Yes , identify the emission unit(s) that was/were not reported in MAERS on an AI-001 Form. Applicable MAERS form(s) for unreported emission units must be included with this application.	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No
C2.	Is this source subject to the federal regulations on ozone-depleting substances? (40 CFR Part 82)	<input checked="" type="checkbox"/> Yes <input type="checkbox"/> No
C3.	Is this source subject to the federal Chemical Accident Prevention Provisions? (Section 112(r) of the Clean Air Act Amendments, 40 CFR Part 68) If Yes , a Risk Management Plan (RMP) and periodic updates must be submitted to the USEPA. Has an updated RMP been submitted to the USEPA?	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No <input type="checkbox"/> Yes <input type="checkbox"/> No
C4.	Has this stationary source added or modified equipment since the last ROP renewal that changes the potential to emit (PTE) for criteria pollutant (CO, NO _x , PM ₁₀ , PM _{2.5} , SO ₂ , VOC, lead) emissions? If Yes , include potential emission calculations (or the PTI and/or ROP revision application numbers, or other references for the PTE demonstration) for the added or modified equipment on an AI-001 Form. If No , criteria pollutant potential emission calculations do not need to be included.	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No
C5.	Has this stationary source added or modified equipment since the last ROP renewal that changes the PTE for hazardous air pollutants (HAPs) regulated by Section 112 of the federal Clean Air Act? If Yes , include potential emission calculations (or the PTI and/or ROP revision application numbers or other references for the PTE demonstration) for the added or modified equipment on an AI-001 Form. Fugitive emissions must be included in HAP emission calculations. If No , HAP potential emission calculations do not need to be included.	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No
C6.	Are any emission units subject to the Cross-State Air Pollution Rule (CSAPR)? If Yes , identify the specific emission unit(s) subject to CSAPR on an AI-001 Form.	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No
C7.	Are any emission units subject to the federal Acid Rain Program? If Yes , identify the specific emission unit(s) subject to the federal Acid Rain Program on an AI-001 Form. Is an Acid Rain Permit Renewal Application included with this application?	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No
C8.	Are any emission units identified in the existing ROP subject to compliance assurance monitoring (CAM)? If Yes , identify the specific emission unit(s) subject to CAM on an AI-001 Form. If a CAM plan has not been previously submitted to EGLE, one must be included with the ROP renewal application on an AI-001 Form. If the CAM Plan has been updated, include an updated copy. Is a CAM plan included with this application? If a CAM Plan is included, check the type of proposed monitoring included in the Plan: 1. Monitoring proposed by the source based on performance of the control device, or 2. Presumptively Acceptable Monitoring, if eligible	<input checked="" type="checkbox"/> Yes <input type="checkbox"/> No <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No <input checked="" type="checkbox"/> <input type="checkbox"/>
C9.	Does the source have any plans such as a malfunction abatement plan, fugitive dust plan, operation/maintenance plan, or any other monitoring plan that is referenced in an existing ROP, Permit to Install requirement, or any other applicable requirement? If Yes , then a copy must be submitted as part of the ROP renewal application.	<input checked="" type="checkbox"/> Yes <input type="checkbox"/> No
C10.	Are there any specific requirements that the source proposes to be identified in the ROP as non-applicable? If Yes , then a description of the requirement and justification must be submitted as part of the ROP renewal application on an AI-001 Form.	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No
<input checked="" type="checkbox"/>	Check here if an AI-001 Form is attached to provide more information for Part C. Enter AI-001 Form ID: AI- AI-Part C8/C9	

PART F: PERMIT TO INSTALL (PTI) INFORMATION

Review all emission units and applicable requirements at the source and answer the following questions as they pertain to all emission units with PTIs. Any PTI(s) identified below must be attached to the application.

F1. Has the source obtained any PTIs where the applicable requirements from the PTI have not been incorporated into the existing ROP? If Yes, complete the following table. If No, go to Part G. Yes No

Permit to Install Number	Emission Units/Flexible Group ID(s)	Description (Include Process Equipment, Control Devices and Monitoring Devices)	Date Emission Unit was Installed/ Modified/ Reconstructed

F2. Do any of the PTIs listed above change, add, or delete terms/conditions to **established emission units** in the existing ROP? If Yes, identify the emission unit(s) or flexible group(s) affected in the comments area below or on an AI-001 Form and identify all changes, additions, and deletions in a mark-up of the existing ROP. Yes No

F3. Do any of the PTIs listed above identify **new emission units** that need to be incorporated into the ROP? If Yes, submit the PTIs as part of the ROP renewal application on an AI-001 Form, and include the new emission unit(s) or flexible group(s) in the mark-up of the existing ROP. Yes No

F4. Are there any stacks with applicable requirements for emission unit(s) identified in the PTIs listed above that were not reported in MAERS for the most recent emissions reporting year? If Yes, identify the stack(s) that were not reported on the applicable MAERS form(s). Yes No

F5. Are there any proposed administrative changes to any of the emission unit names, descriptions or control devices in the PTIs listed above for any emission units not already incorporated into the ROP? If Yes, describe the changes on an AI-001 Form. Yes No

Comments:

Check here if an AI-001 Form is attached to provide more information for Part F. Enter AI-001 Form ID: AI-

PART G: EMISSION UNITS MEETING THE CRITERIA OF RULES 281(2)(h), 285(2)(r)(iv), 287(2)(c), OR 290

Review all emission units and applicable requirements at the source and answer the following questions:

G1. Does the source have any new and/or existing emission units which do not already appear in the existing ROP and which meet the criteria of Rules 281(2)(h), 285(2)(r)(iv), 287(2)(c), or 290. Yes No
 If Yes, identify the emission units in the table below. If No, go to Part H.
Note: If several emission units were installed under the same rule above, provide a description of each and an installation/modification/reconstruction date for each.

Origin of Applicable Requirements	Emission Unit Description – Provide Emission Unit ID and a description of Process Equipment, Control Devices and Monitoring Devices	Date Emission Unit was Installed/ Modified/ Reconstructed
<input type="checkbox"/> Rule 281(2)(h) or 285(2)(r)(iv) cleaning operation		
<input type="checkbox"/> Rule 287(2)(c) surface coating line		
<input type="checkbox"/> Rule 290 process with limited emissions		

Comments:

Check here if an AI-001 Form is attached to provide more information for Part G. Enter AI-001 Form ID: AI-

PART H: REQUIREMENTS FOR ADDITION OR CHANGE

Complete this part of the application form for all proposed additions, changes or deletions to the existing ROP. This includes state or federal regulations that the source is subject to and that must be incorporated into the ROP or other proposed changes to the existing ROP. **Do not include additions or changes that have already been identified in Parts F or G of this application form.** If additional space is needed copy and complete an additional Part H.

Complete a separate Part H for each emission unit with proposed additions and/or changes.

H1. Are there changes that need to be incorporated into the ROP that have not been identified in Parts F and G? If <u>Yes</u> , answer the questions below.	<input checked="" type="checkbox"/> Yes <input type="checkbox"/> No
H2. Are there any proposed administrative changes to any of the existing emission unit names, descriptions or control devices in the ROP? If <u>Yes</u> , describe the changes in questions H8 – H16 below and in the affected Emission Unit Table(s) in the mark-up of the ROP.	<input checked="" type="checkbox"/> Yes <input type="checkbox"/> No
H3. Does the source propose to add a new emission unit or flexible group to the ROP not previously identified in Parts F or G? If <u>Yes</u> , identify and describe the emission unit name, process description, control device(s), monitoring device(s) and applicable requirements in questions H8 – H16 below and in a new Emission Unit Table in the mark-up of the ROP. See instructions on how to incorporate a new emission unit/flexible group into the ROP.	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No
H4. Does the source propose to add new state or federal regulations to the existing ROP? If <u>Yes</u> , on an AI-001 Form, identify each emission unit/flexible group that the new regulation applies to and identify <u>each</u> state or federal regulation that should be added. Also, describe the new requirements in questions H8 – H16 below and add the specific requirements to existing emission units/flexible groups in the mark-up of the ROP, create a new Emission Unit/Flexible Group Table, or add an AQD template table for the specific state or federal requirement.	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No
H5. Has a Consent Order/Consent Judgment (CO/CJ) been issued where the requirements were not incorporated into the existing ROP? If <u>Yes</u> , list the CO/CJ number(s) below and add or change the conditions and underlying applicable requirements in the appropriate Emission Unit/Flexible Group Tables in the mark-up of the ROP.	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No
H6. Does the source propose to add, change and/or delete source-wide requirements? If <u>Yes</u> , identify the addition/change/deletion in a mark-up of the corresponding section of the ROP and provide a justification below.	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No
H7. Are you proposing to streamline any requirements? If <u>Yes</u> , identify the streamlined and subsumed requirements and the EU ID, and provide a justification for streamlining the applicable requirement below.	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No

PART H: REQUIREMENTS FOR ADDITION OR CHANGE – (continued)

<p>H8. Does the source propose to add, change and/or delete emission limit requirements? If <u>Yes</u>, identify the addition/change/deletion in a mark-up of the corresponding section of the ROP and provide a justification below.</p>	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No
<p>H9. Does the source propose to add, change and/or delete material limit requirements? If <u>Yes</u>, identify the addition/change/deletion in a mark-up of the corresponding section of the ROP and provide a justification below.</p>	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No
<p>H10. Does the source propose to add, change and/or delete process/operational restriction requirements? If <u>Yes</u>, identify the addition/change/deletion in a mark-up of the corresponding section of the ROP and provide a justification below.</p> <p>Revisions made to FG-MACT III AUTO ASSEMBLY, FG-MACT ZZZZ-CI ≤ 500 HP, and FG-MACT ZZZZ-CI >500HP to reflect the special conditions in MI EGLE MACT templates.</p>	<input checked="" type="checkbox"/> Yes <input type="checkbox"/> No
<p>H11. Does the source propose to add, change and/or delete design/equipment parameter requirements? If <u>Yes</u>, identify the addition/change/deletion in a mark-up of the corresponding section of the ROP and provide a justification below.</p> <p>Revisions made to FG-MACT ZZZZ-CI ≤ 500 HP and FG-MACT ZZZZ-CI >500HP to reflect the special conditions in MI EGLE MACT templates.</p>	<input checked="" type="checkbox"/> Yes <input type="checkbox"/> No
<p>H12. Does the source propose to add, change and/or delete testing/sampling requirements? If <u>Yes</u>, identify the addition/change/deletion in a mark-up of the corresponding section of the ROP and provide a justification below.</p> <p>See AI-Part H12</p>	<input checked="" type="checkbox"/> Yes <input type="checkbox"/> No
<p>H13. Does the source propose to add, change and/or delete monitoring/recordkeeping requirements? If <u>Yes</u>, identify the addition/change/deletion in a mark-up of the corresponding section of the ROP and provide a justification below.</p> <p>See AI-Part H13</p>	<input checked="" type="checkbox"/> Yes <input type="checkbox"/> No
<p>H14. Does the source propose to add, change and/or delete reporting requirements? If <u>Yes</u>, identify the addition/change/deletion in a mark-up of the corresponding section of the ROP and provide a justification below.</p> <p>Revisions made to FG-MACT III AUTO ASSEMBLY to reflect the special conditions in MI EGLE MACT templates.</p>	<input checked="" type="checkbox"/> Yes <input type="checkbox"/> No

PART H: REQUIREMENTS FOR ADDITION OR CHANGE – (continued)

H15. Does the source propose to add, change and/or delete **stack/vent restrictions**? If Yes, identify the addition/change/deletion in a mark-up of the corresponding section of the ROP and provide a justification below. Yes No

H16. Does the source propose to add, change and/or delete any **other** requirements? If Yes, identify the addition/change/deletion in a mark-up of the corresponding section of the ROP and provide a justification below. Yes No

See AI-Part H16

Refer to ROP Mark-up

H17. Does the source propose to add terms and conditions for an alternative operating scenario or intra-facility trading of emissions? If Yes, identify the proposed conditions in a mark-up of the corresponding section of the ROP and provide a justification below. Yes No

Check here if an AI-001 Form is attached to provide more information for Part H. Enter AI-001 Form ID: **AI-Part H**

Testing/Sampling

1. The facility is requesting to modify the testing language in EU-Electrocoat, EU-Guidecoat, EU-Sealers&Adhes, EU-GlassInstall, EU-Foam, FG-Facility, FG-Topcoat and FG-Repair to provide flexibility for determining VOC content of materials, and to be consistent with other GM ROPs.

2. The facility is requesting to modify the testing language in EU-Deadener to be consistent with other GM ROPs. The proposed language is:
 "The applicant shall maintain a current listing from the manufacturer of the chemical composition of the materials used in EU-Deadener including the weight percent of each component. The data may consist of Safety Data Sheets, manufacturer's formulation data, or both. The data shall be kept on file for a period of at least five years and made available to the Department upon request.2 (R 336.1225, R 336.1702(a), 40 CFR 52.21(j))"

3. The facility is requesting to remove the testing language in FG-Solvents and FG-StorageTanks to be consistent with other GM ROPs.

4. The facility is requesting to modify the testing language in FG – MACT ZZZZ – CI ≤ 500 HP to be consistent with the MI EGLE MACT template.

The proposed modifications are included in the ROP mark-up.

Monitoring/Recordkeeping

1. The facility is requesting to modify the language in FG-StorageTanks, Special Condition VI.1 to remove requirements associated with methanol storage.

2. The facility is requesting to modify the language in FG-MACT IIII AUTO ASSEMBLY, FG-MACT ZZZZ-CI ≤ 500 HP, and FG-MACT ZZZZ-CI >500HP to reflect the special conditions in the MI EGLE MACT templates.

3. The facility is requesting to modify the language in FG-COLDCLEANERS, Special Condition VI.1. The proposed language is consistent with other similar GM ROPs issued in Michigan.

Proposed Language:
 "For each new cold cleaner in which the solvent is heated, the solvent temperature shall be monitored and recorded at least once each calendar week during routine operating conditions. In lieu of monitoring and recording the solvent temperature, the permittee may use a temperature control device to set the temperature below 120 degrees Fahrenheit. (R 336.1213(3))"

The proposed modifications are included in the ROP mark-up.

Permit Number: MI-PTI-~~A1641A1641~~-2017

This Permit to Install (PTI) is issued in accordance with and subject to Section 5505(5) of Act 451. Pursuant to Michigan Air Pollution Control Rule 214a, the terms and conditions herein, identified by the underlying applicable requirement citation of Rule 201(1)(a), constitute a federally enforceable PTI. The PTI terms and conditions do not expire and remain in effect unless the criteria of Rule 201(6) are met. Operation of all emission units identified in the PTI is subject to all applicable future or amended rules and regulations pursuant to Act 451 and the federal Clean Air Act.

AUTHORITY AND ENFORCEABILITY

For the purpose of this permit, the **permittee** is defined as any person who owns or operates an emission unit at a stationary source for which this permit has been issued. The **department** is defined in Rule 104(d) as the Director of the Michigan Department of Environmental Quality (**MDEQEGLE**) or his or her designee.

The permittee shall comply with all specific details in the permit terms and conditions and the cited underlying applicable requirements. All terms and conditions in this ROP are both federally enforceable and state enforceable unless otherwise footnoted. Certain terms and conditions are applicable to most stationary sources for which an ROP has been issued. These general conditions are included in Part A of this ROP. Other terms and conditions may apply to a specific emission unit, several emission units which are represented as a flexible group, or the entire stationary source which is represented as a source-wide group. Special conditions are identified in Parts B, C, D and/or the appendices.

In accordance with Rule 213(2)(a), all underlying applicable requirements will be identified for each ROP term or condition. All terms and conditions that are included in a PTI, are streamlined or subsumed, or is state only enforceable will be noted as such.

In accordance with Section 5507 of Act 451, the permittee has included in the ROP application a compliance certification, a schedule of compliance, and a compliance plan. For applicable requirements with which the source is in compliance, the source will continue to comply with these requirements. For applicable requirements with which the source is not in compliance, the source will comply with the detailed schedule of compliance requirements that are incorporated as an appendix in this ROP. Furthermore, for any applicable requirements effective after the date of issuance of this ROP, the stationary source will meet the requirements on a timely basis, unless the underlying applicable requirement requires a more detailed schedule of compliance.

Issuance of this permit does not obviate the necessity of obtaining such permits or approvals from other units of government as required by law.

A. GENERAL CONDITIONS

Permit Enforceability

- All conditions in this permit are both federally enforceable and state enforceable unless otherwise noted. **(R 336.1213(5))**
- Those conditions that are hereby incorporated in a state only enforceable Source-wide PTI pursuant to Rule 201(2)(d) are designated by footnote one. **(R 336.1213(5)(a), R 336.1214a(5))**
- Those conditions that are hereby incorporated in federally enforceable Source-wide PTI No. MI-PTI-[A1641A1641](#)-[2020](#)12b pursuant to Rule 201(2)(c) are designated by footnote two. **(R 336.1213(5)(b), R 336.1214a(3))**

Formatted: Font: 10 pt

Formatted: Font: 10 pt

General Provisions

1. The permittee shall comply with all conditions of this ROP. Any ROP noncompliance constitutes a violation of Act 451, and is grounds for enforcement action, for ROP revocation or revision, or for denial of the renewal of the ROP. All terms and conditions of this ROP that are designated as federally enforceable are enforceable by the Administrator of the United States Environmental Protection Agency (USEPA) and by citizens under the provisions of the federal Clean Air Act (CAA). Any terms and conditions based on applicable requirements which are designated as "state only" are not enforceable by the USEPA or citizens pursuant to the CAA. **(R 336.1213(1)(a))**
2. It shall not be a defense for the permittee in an enforcement action that it would have been necessary to halt or reduce the permitted activity in order to maintain compliance with the conditions of this ROP. **(R 336.1213(1)(b))**
3. This ROP may be modified, revised, or revoked for cause. The filing of a request by the permittee for a permit modification, revision, or termination, or a notification of planned changes or anticipated noncompliance does not stay any ROP term or condition. This does not supersede or affect the ability of the permittee to make changes, at the permittee's own risk, pursuant to Rule 215 and Rule 216. **(R 336.1213(1)(c))**
4. The permittee shall allow the department, or an authorized representative of the department, upon presentation of credentials and other documents as may be required by law and upon stating the authority for and purpose of the investigation, to perform any of the following activities **(R 336.1213(1)(d))**:
 - a. Enter, at reasonable times, a stationary source or other premises where emissions-related activity is conducted or where records must be kept under the conditions of the ROP.
 - b. Have access to and copy, at reasonable times, any records that must be kept under the conditions of the ROP.
 - c. Inspect, at reasonable times, any of the following:
 - i. Any stationary source.
 - ii. Any emission unit.
 - iii. Any equipment, including monitoring and air pollution control equipment.
 - iv. Any work practices or operations regulated or required under the ROP.
 - d. As authorized by Section 5526 of Act 451, sample or monitor at reasonable times substances or parameters for the purpose of assuring compliance with the ROP or applicable requirements.
5. The permittee shall furnish to the department, within a reasonable time, any information the department may request, in writing, to determine whether cause exists for modifying, revising, or revoking the ROP or to determine compliance with this ROP. Upon request, the permittee shall also furnish to the department copies of any records that are required to be kept as a term or condition of this ROP. For information which is claimed by the permittee to be confidential, consistent with the requirements of the 1976 PA 442, MCL §15.231 et seq.,

Formatted: Font: 10 pt

and known as the Freedom of Information Act, the person may also be required to furnish the records directly to the USEPA together with a claim of confidentiality. **(R 336.1213(1)(e))**

6. A challenge by any person, the Administrator of the USEPA, or the department to a particular condition or a part of this ROP shall not set aside, delay, stay, or in any way affect the applicability or enforceability of any other condition or part of this ROP. **(R 336.1213(1)(f))**
7. The permittee shall pay fees consistent with the fee schedule and requirements pursuant to Section 5522 of Act 451. **(R 336.1213(1)(g))**
8. This ROP does not convey any property rights or any exclusive privilege. **(R 336.1213(1)(h))**

Equipment & Design

9. Any collected air contaminants shall be removed as necessary to maintain the equipment at the required operating efficiency. The collection and disposal of air contaminants shall be performed in a manner so as to minimize the introduction of contaminants to the outer air. Transport of collected air contaminants in Priority I and II areas requires the use of material handling methods specified in Rule 370(2). **(R 336.1370)**
10. Any air cleaning device shall be installed, maintained, and operated in a satisfactory manner and in accordance with the Michigan Air Pollution Control rules and existing law. **(R 336.1910)**

Emission Limits

11. Except as provided in Subrules 2, 3, and 4 of Rule 301, states in part; "a person shall not cause or permit to be discharged into the outer air from a process or process equipment a visible emission of a density greater than the most stringent of Rule 301(1)(a) or (b) unless otherwise specified in this ROP." The grading of visible emissions shall be determined in accordance with Rule 303. **(R 336.1301(1) in pertinent part):**
 - a. A 6-minute average of 20 percent opacity, except for one 6-minute average per hour of not more than 27 percent opacity.
 - b. A limit specified by an applicable federal new source performance standard.
12. The permittee shall not cause or permit the emission of an air contaminant or water vapor in quantities that cause, alone or in reaction with other air contaminants, either of the following:
 - a. Injurious effects to human health or safety, animal life, plant life of significant economic value, or property.¹ **(R 336.1901(a))**
 - b. Unreasonable interference with the comfortable enjoyment of life and property.¹ **(R 336.1901(b))**

Testing/Sampling

13. The department may require the owner or operator of any source of an air contaminant to conduct acceptable performance tests, at the owner's or operator's expense, in accordance with Rule 1001 and Rule 1003, under any of the conditions listed in Rule 1001(1). **(R 336.2001)**
14. Any required performance testing shall be conducted in accordance with Rule 1001(2), Rule 1001(3) and Rule 1003. **(R 336.2001(2), R 336.2001(3), R 336.2003(1))**
15. Any required test results shall be submitted to the Air Quality Division (AQD) in the format prescribed by the applicable reference test method within 60 days following the last date of the test. **(R 336.2001(4))**

Monitoring/Recordkeeping

16. Records of any periodic emission or parametric monitoring required in this ROP shall include the following information specified in Rule 213(3)(b)(i), where appropriate **(R 336.1213(3)(b)):**
 - a. The date, location, time, and method of sampling or measurements.

- b. The dates the analyses of the samples were performed.
 - c. The company or entity that performed the analyses of the samples.
 - d. The analytical techniques or methods used.
 - e. The results of the analyses.
 - f. The related process operating conditions or parameters that existed at the time of sampling or measurement.
17. All required monitoring data, support information and all reports, including reports of all instances of deviation from permit requirements, shall be kept and furnished to the department upon request for a period of not less than 5 years from the date of the monitoring sample, measurement, report or application. Support information includes all calibration and maintenance records and all original strip-chart recordings, or other original data records, for continuous monitoring instrumentation and copies of all reports required by the ROP. **(R 336.1213(1)(e), R 336.1213(3)(b)(ii))**

Certification & Reporting

18. Except for the alternate certification schedule provided in Rule 213(3)(c)(iii)(B), any document required to be submitted to the department as a term or condition of this ROP shall contain an original certification by a responsible official which states that, based on information and belief formed after reasonable inquiry, the statements and information in the document are true, accurate, and complete. **(R 336.1213(3)(c))**
19. A responsible official shall certify to the appropriate AQD District Office and to the USEPA that the stationary source is and has been in compliance with all terms and conditions contained in the ROP except for deviations that have been or are being reported to the appropriate AQD District Office pursuant to Rule 213(3)(c). This certification shall include all the information specified in Rule 213(4)(c)(i) through (v) and shall state that, based on information and belief formed after reasonable inquiry, the statements and information in the certification are true, accurate, and complete. The USEPA address is: USEPA, Air Compliance Data - Michigan, Air and Radiation Division, 77 West Jackson Boulevard, Chicago, Illinois 60604. **(R 336.1213(4)(c))**
20. The certification of compliance shall be submitted annually for the term of this ROP as detailed in the special conditions, or more frequently if specified in an applicable requirement or in this ROP. **(R 336.1213(4)(c))**
21. The permittee shall promptly report any deviations from ROP requirements and certify the reports. The prompt reporting of deviations from ROP requirements is defined in Rule 213(3)(c)(ii) as follows, unless otherwise described in this ROP. **(R 336.1213(3)(c))**
- a. For deviations that exceed the emissions allowed under the ROP, prompt reporting means reporting consistent with the requirements of Rule 912 as detailed in Condition 25. All reports submitted pursuant to this paragraph shall be promptly certified as specified in Rule 213(3)(c)(iii).
 - b. For deviations which exceed the emissions allowed under the ROP and which are not reported pursuant to Rule 912 due to the duration of the deviation, prompt reporting means the reporting of all deviations in the semiannual reports required by Rule 213(3)(c)(i). The report shall describe reasons for each deviation and the actions taken to minimize or correct each deviation.
 - c. For deviations that do not exceed the emissions allowed under the ROP, prompt reporting means the reporting of all deviations in the semiannual reports required by Rule 213(3)(c)(i). The report shall describe the reasons for each deviation and the actions taken to minimize or correct each deviation.
22. For reports required pursuant to Rule 213(3)(c)(ii), prompt certification of the reports is described in Rule 213(3)(c)(iii) as either of the following **(R 336.1213(3)(c))**:
- a. Submitting a certification by a responsible official with each report which states that, based on information and belief formed after reasonable inquiry, the statements and information in the report are true, accurate, and complete.
 - b. Submitting, within 30 days following the end of a calendar month during which one or more prompt reports of deviations from the emissions allowed under the ROP were submitted to the department pursuant to Rule 213(3)(c)(ii), a certification by a responsible official which states that, "based on information and belief formed after reasonable inquiry, the statements and information contained in each of the reports submitted

Formatted: Font: 10 pt

during the previous month were true, accurate, and complete". The certification shall include a listing of the reports that are being certified. Any report submitted pursuant to Rule 213(3)(c)(ii) that will be certified on a monthly basis pursuant to this paragraph shall include a statement that certification of the report will be provided within 30 days following the end of the calendar month.

23. Semi-annually for the term of the ROP as detailed in the special conditions, or more frequently if specified, the permittee shall submit certified reports of any required monitoring to the appropriate AQD District Office. All instances of deviations from ROP requirements during the reporting period shall be clearly identified in the reports. **(R 336.1213(3)(c)(i))**
24. On an annual basis, the permittee shall report the actual emissions, or the information necessary to determine the actual emissions, of each regulated air pollutant as defined in Rule 212(6) for each emission unit utilizing the emissions inventory forms provided by the department. **(R 336.1212(6))**
25. The permittee shall provide notice of an abnormal condition, start-up, shutdown, or malfunction that results in emissions of a hazardous or toxic air pollutant which continue for more than one hour in excess of any applicable standard or limitation, or emissions of any air contaminant continuing for more than two hours in excess of an applicable standard or limitation, as required in Rule 912, to the appropriate AQD District Office. The notice shall be provided not later than two business days after the start-up, shutdown, or discovery of the abnormal conditions or malfunction. Notice shall be by any reasonable means, including electronic, telephonic, or oral communication. Written reports, if required under Rule 912, must be submitted to the appropriate AQD District Supervisor within 10 days after the start-up or shutdown occurred, within 10 days after the abnormal conditions or malfunction has been corrected, or within 30 days of discovery of the abnormal conditions or malfunction, whichever is first. The written reports shall include all of the information required in Rule 912(5) and shall be certified by a responsible official in a manner consistent with the CAA. **(R 336.1912)**

Permit Shield

26. Compliance with the conditions of the ROP shall be considered compliance with any applicable requirements as of the date of ROP issuance, if either of the following provisions is satisfied. **(R 336.1213(6)(a)(i), R 336.1213(6)(a)(ii))**
 - a. The applicable requirements are included and are specifically identified in the ROP.
 - b. The permit includes a determination or concise summary of the determination by the department that other specifically identified requirements are not applicable to the stationary source.

Any requirements identified in Part E of this ROP have been identified as non-applicable to this ROP and are included in the permit shield.
27. Nothing in this ROP shall alter or affect any of the following:
 - a. The provisions of Section 303 of the CAA, emergency orders, including the authority of the USEPA under Section 303 of the CAA. **(R 336.1213(6)(b)(i))**
 - b. The liability of the owner or operator of this source for any violation of applicable requirements prior to or at the time of this ROP issuance. **(R 336.1213(6)(b)(ii))**
 - c. The applicable requirements of the acid rain program, consistent with Section 408(a) of the CAA. **(R 336.1213(6)(b)(iii))**
 - d. The ability of the USEPA to obtain information from a source pursuant to Section 114 of the CAA. **(R 336.1213(6)(b)(iv))**
28. The permit shield shall not apply to provisions incorporated into this ROP through procedures for any of the following:
 - a. Operational flexibility changes made pursuant to Rule 215. **(R 336.1215(5))**
 - b. Administrative Amendments made pursuant to Rule 216(1)(a)(i)-(iv). **(R 336.1216(1)(b)(iii))**
 - c. Administrative Amendments made pursuant to Rule 216(1)(a)(v) until the amendment has been approved by the department. **(R 336.1216(1)(c)(iii))**
 - d. Minor Permit Modifications made pursuant to Rule 216(2). **(R 336.1216(2)(f))**

Formatted: Font: 10 pt

29. Expiration of this ROP results in the loss of the permit shield. If a timely and administratively complete application for renewal is submitted not more than 18 months, but not less than 6 months, before the expiration date of the ROP, but the department fails to take final action before the end of the ROP term, the existing ROP does not expire until the renewal is issued or denied, and the permit shield shall extend beyond the original ROP term until the department takes final action. **(R 336.1217(1)(c), R 336.1217(1)(a))**

Revisions

30. For changes to any process or process equipment covered by this ROP that do not require a revision of the ROP pursuant to Rule 216, the permittee must comply with Rule 215. **(R 336.1215, R 336.1216)**
31. A change in ownership or operational control of a stationary source covered by this ROP shall be made pursuant to Rule 216(1). **(R 336.1219(2))**
32. For revisions to this ROP, an administratively complete application shall be considered timely if it is received by the department in accordance with the time frames specified in Rule 216. **(R 336.1210(9))**
33. Pursuant to Rule 216(1)(b)(iii), Rule 216(2)(d) and Rule 216(4)(d), after a change has been made, and until the department takes final action, the permittee shall comply with both the applicable requirements governing the change and the ROP terms and conditions proposed in the application for the modification. During this time period, the permittee may choose to not comply with the existing ROP terms and conditions that the application seeks to change. However, if the permittee fails to comply with the ROP terms and conditions proposed in the application during this time period, the terms and conditions in the ROP are enforceable. **(R 336.1216(1)(c)(iii), R 336.1216(2)(d), R 336.1216(4)(d))**

Re-openings

34. A ROP shall be reopened by the department prior to the expiration date and revised by the department under any of the following circumstances:
- If additional requirements become applicable to this stationary source with three or more years remaining in the term of the ROP, but not if the effective date of the new applicable requirement is later than the ROP expiration date. **(R 336.1217(2)(a)(i))**
 - If additional requirements pursuant to Title IV of the CAA become applicable to this stationary source. **(R 336.1217(2)(a)(ii))**
 - If the department determines that the ROP contains a material mistake, information required by any applicable requirement was omitted, or inaccurate statements were made in establishing emission limits or the terms or conditions of the ROP. **(R 336.1217(2)(a)(iii))**
 - If the department determines that the ROP must be revised to ensure compliance with the applicable requirements. **(R 336.1217(2)(a)(iv))**

Renewals

35. For renewal of this ROP, an administratively complete application shall be considered timely if it is received by the department not more than 18 months, but not less than 6 months, before the expiration date of the ROP. **(R 336.1210(7))**

Stratospheric Ozone Protection

36. If the permittee is subject to Title 40 of the Code of Federal Regulations (CFR), Part 82 and services, maintains, or repairs appliances except for motor vehicle air conditioners (MVAC), or disposes of appliances containing refrigerant, including MVAC and small appliances, or if the permittee is a refrigerant reclaimer, appliance owner or a manufacturer of appliances or recycling and recovery equipment, the permittee shall comply with all applicable standards for recycling and emissions reduction pursuant to 40 CFR, Part 82, Subpart F.

20~~22~~17

ROP No: MI-ROP-~~A1641A1641-~~

Formatted: Font: 10 pt

Expiration Date: November 20, 2022

PTI No.: MI-PTI-~~A1641A1641-~~20~~22~~17

Formatted: Font: 10 pt

37. If the permittee is subject to 40 CFR, Part 82, and performs a service on motor (fleet) vehicles when this service involves refrigerant in the MVAC, the permittee is subject to all the applicable requirements as specified in 40 CFR, Part 82, Subpart B, Servicing of Motor Vehicle Air Conditioners. The term "motor vehicle" as used in Subpart B does not include a vehicle in which final assembly of the vehicle has not been completed by the original equipment manufacturer. The term MVAC as used in Subpart B does not include the air-tight sealed refrigeration system used for refrigerated cargo or an air conditioning system on passenger buses using Hydrochlorofluorocarbon-22 refrigerant.

Risk Management Plan

38. If subject to Section 112(r) of the CAA and 40 CFR, Part 68, the permittee shall register and submit to the USEPA the required data related to the risk management plan for reducing the probability of accidental releases of any regulated substances listed pursuant to Section 112(r)(3) of the CAA as amended in 40 CFR, Part 68.130. The list of substances, threshold quantities, and accident prevention regulations promulgated under 40 CFR, Part 68, do not limit in any way the general duty provisions under Section 112(r)(1).
39. If subject to Section 112(r) of the CAA and 40 CFR, Part 68, the permittee shall comply with the requirements of 40 CFR, Part 68, no later than the latest of the following dates as provided in 40 CFR, Part 68.10(a):
- June 21, 1999,
 - Three years after the date on which a regulated substance is first listed under 40 CFR, Part 68.130, or
 - The date on which a regulated substance is first present above a threshold quantity in a process.
40. If subject to Section 112(r) of the CAA and 40 CFR, Part 68, the permittee shall submit any additional relevant information requested by any regulatory agency necessary to ensure compliance with the requirements of 40 CFR, Part 68.
41. If subject to Section 112(r) of the CAA and 40 CFR, Part 68, the permittee shall annually certify compliance with all applicable requirements of Section 112(r) as detailed in Rule 213(4)(c)). **(40 CFR, Part 68)**

Emission Trading

42. Emission averaging and emission reduction credit trading are allowed pursuant to any applicable interstate or regional emission trading program that has been approved by the Administrator of the USEPA as a part of Michigan's State Implementation Plan. Such activities must comply with Rule 215 and Rule 216. **(R 336.1213(12))**

Permit To Install (PTI)

43. The process or process equipment included in this permit shall not be reconstructed, relocated, or modified unless a PTI authorizing such action is issued by the department, except to the extent such action is exempt from the PTI requirements by any applicable rule. ² **(R 336.1201(1))**
44. The department may, after notice and opportunity for a hearing, revoke PTI terms or conditions if evidence indicates the process or process equipment is not performing in accordance with the terms and conditions of the PTI or is violating the department's rules or the CAA. ² **(R 336.1201(8), Section 5510 of Act 451)**
45. The terms and conditions of a PTI shall apply to any person or legal entity that now or hereafter owns or operates the process or process equipment at the location authorized by the PTI. If a new owner or operator submits a written request to the department pursuant to Rule 219 and the department approves the request, this PTI will be amended to reflect the change of ownership or operational control. The request must include all of the information required by Subrules (1)(a), (b) and (c) of Rule 219. The written request shall be sent to the appropriate AQD District Supervisor, **MDEQEGL**. ² **(R 336.1219)**

46. If the installation, reconstruction, relocation, or modification of the equipment for which PTI terms and conditions have been approved has not commenced within 18 months, or has been interrupted for 18 months, the applicable terms and conditions from that PTI shall become void unless otherwise authorized by the department. Furthermore, the person to whom that PTI was issued, or the designated authorized agent, shall notify the department via the Supervisor, Permit Section, ~~MDEQEGLE~~, AQD, P. O. Box 30260, Lansing, Michigan 48909, if it is decided not to pursue the installation, reconstruction, relocation, or modification of the equipment allowed by the terms and conditions from that PTI. ² **(R 336.1201(4))**

B. SOURCE-WIDE CONDITIONS

Part B outlines the Source-Wide Terms and Conditions that apply to this stationary source. The permittee is subject to these special conditions for the stationary source in addition to the general conditions in Part A and any other terms and conditions contained in this ROP.

The permittee shall comply with all specific details in the special conditions and the underlying applicable requirements cited. If a specific condition type does not apply to this source, NA (not applicable) has been used in the table. If there are no Source-Wide Conditions, this section will be left blank.

C. EMISSION UNIT CONDITIONS

Part C outlines terms and conditions that are specific to individual emission units listed in the Emission Unit Summary Table. The permittee is subject to the special conditions for each emission unit in addition to the General Conditions in Part A and any other terms and conditions contained in this ROP.

The permittee shall comply with all specific details in the special conditions and the underlying applicable requirements cited. If a specific condition type does not apply, NA (not applicable) has been used in the table. If there are no conditions specific to individual emission units, this section will be left blank.

**EU-Electrocoat
EMISSION UNIT CONDITIONS**

DESCRIPTION

An electrocoat dip tank followed by an electrocoat curing oven followed by a dry filtered scuff booth.

Flexible Group ID: FG-Facility, FG-MACT ~~IIII-AUTO ASSEMBLY~~

POLLUTION CONTROL EQUIPMENT

VOC emissions from both the tank and oven are controlled by a thermal oxidizer (No. 1).

Note: VOC emissions from the guidecoat curing oven and the two topcoat curing ovens are also controlled by thermal oxidizer No. 1.

I. EMISSION LIMIT(S)

Pollutant	Limit	Time Period/ Operating Scenario	Equipment	Monitoring/ Testing Method	Underlying Applicable Requirements
NA					

II. MATERIAL LIMIT(S)

Material	Limit	Time Period/ Operating Scenario	Equipment	Monitoring/ Testing Method	Underlying Applicable Requirements
NA					

III. PROCESS/OPERATIONAL RESTRICTION(S)

1. The permittee shall operate EU-Electrocoat such that positive airflow into the enclosed area around the electrocoat dip tank occurs whenever EU-Electrocoat is in use. Positive airflow shall be demonstrated according to a method acceptable to the AQD District Supervisor. In addition, the permittee shall keep all access doors and windows closed on the electrocoat dip tank whenever EU-Electrocoat is in operation.² (R 336.1702(a) & 40 CFR 52.21)

IV. DESIGN/EQUIPMENT PARAMETER(S)

1. The permittee shall not operate EU-Electrocoat unless Thermal Oxidizer No. 1 is installed, maintained and operated in a satisfactory manner. Satisfactory operation of the thermal oxidizer includes maintaining a minimum combustion chamber temperature of 1400 °F and a minimum retention time of 0.5 seconds. In lieu of a minimum temperature, an average temperature of 1400 °F based upon a three-hour rolling average may be used.² (R 336.1225, R 336.1702(a), R 336.1901 & 40 CFR 52.21)

202217

ROP No: MI-ROP-~~A1641A1641~~

Formatted: Font: 10 pt

Expiration Date: November 20, 2022

PTI No.: MI-PTI-~~A1641A1641~~-202217

Formatted: Font: 10 pt

V. TESTING/SAMPLING

Records shall be maintained on file for a period of five years. (R 336.1213(3)(b)(ii))

1. The VOC content, ~~water content and density~~ of the resin, pigment and additives, as added to the Electrocoat tank, shall be determined using federal Reference Test Method 24 or an alternative method approved by the AQD District Supervisor. Alternatively, ~~for waterborne materials~~, the VOC content may be determined from manufacturer's formulation data. If the Method 24 and the formulation values should differ, the Method 24 results shall be used to determine compliance. Upon request of the District Supervisor, the VOC content, ~~water content and density~~ of the resin, pigment and additives as added to the Electrocoat tank shall be verified by testing using federal Reference Test Method 24.² (R 336.1702(a) & 40 CFR 52.21)

See Appendix 5

VI. MONITORING/RECORDKEEPING

Records shall be maintained on file for a period of five years. (R 336.1213(3)(b)(ii))

1. The permittee shall install, calibrate, maintain and operate in a satisfactory manner a temperature monitoring device in the combustion chamber of Thermal Oxidizer No. 1 to monitor and record the temperature on a continuous basis, during operation of EU-Electrocoat. Temperature data recording shall consist of measurements made at equally spaced intervals, not to exceed 15 minutes per interval.² (R 336.1702(a), 40 CFR 52.21 & 40 CFR 60 Subpart MM)
2. The permittee shall keep, in a satisfactory manner, operating temperature records for Thermal Oxidizer No. 1 as required by SC VI.1. If the measured operating temperature of Thermal Oxidizer No. 1 falls below 1400 °F during operation of EU-Electrocoat, compliance may be demonstrated based upon a three-hour average temperature, by calculating the average operating temperature for each three hour period which includes one or more temperature readings below 1400 °F. All calculations and records shall be kept on file for a period of at least five years and made available to the Department upon request.² (R 336.1702(a), 40 CFR 52.21 & 40 CFR 60 Subpart MM)

VII. REPORTING

1. Prompt reporting of deviations pursuant to General Conditions 21 and 22 of Part A. (R 336.1213(3)(c)(ii))
2. Semi-annual reporting of monitoring and deviations pursuant to General Condition 23 of Part A. The report shall be postmarked or received by the appropriate AQD District Office by March 15 for reporting period July 1 to December 31 and September 15 for reporting period January 1 to June 30. (R 336.1213(3)(c)(i))
3. Annual certification of compliance pursuant to General Conditions 19 and 20 of Part A. The report shall be postmarked or received by the appropriate AQD District Office by March 15 for the previous calendar year. (R 336.1213(4)(c))

See Appendix 8

VIII. STACK/VENT RESTRICTION(S)

The exhaust gases from the stacks listed in the table below shall be discharged unobstructed vertically upwards to the ambient air unless otherwise noted:

Stack & Vent ID	Maximum Exhaust Dimensions (inches)	Minimum Height Above Ground (feet)	Underlying Applicable Requirements

EU-Guidecoat EMISSION UNIT CONDITIONS

DESCRIPTION

A guidecoat spray booth followed by a curing oven. The solvent borne guidecoat is applied automatically with electrostatic bell applicators or equivalent.

Flexible Group ID: FG-Facility, FG-MACT III-AUTO ASSEMBLY

POLLUTION CONTROL EQUIPMENT

The guidecoat booth is equipped with a wet eliminator system to control particulate emissions from paint overspray. The spraybooth is comprised of two zones, both utilizing automatic applicators. VOC emissions from Zone 1 of the automatic electrostatic bell section of the guidecoat booth are controlled by thermal oxidizer No. 2. VOC emissions from Zone 2 are vented to the atmosphere. VOC emissions from the guidecoat curing oven are controlled by thermal oxidizer No. 1.

Note: VOC emissions from the electrocoat dip tank and the electrocoat curing oven and the two topcoat curing ovens are also controlled by thermal oxidizer No. 1.

Note: VOC emissions from the two automatic clearcoat sections of the two topcoat booths and the heated flash are also controlled by thermal oxidizer No. 2.

I. EMISSION LIMIT(S)

Pollutant	Limit	Time Period/ Operating Scenario	Equipment	Monitoring/ Testing Method	Underlying Applicable Requirements
NA					

II. MATERIAL LIMIT(S)

Material	Limit	Time Period/ Operating Scenario	Equipment	Monitoring/ Testing Method	Underlying Applicable Requirements
NA					

III. PROCESS/OPERATIONAL RESTRICTION(S)

- The permittee shall operate Zone 1 of the automatic bells section portion of EU-Guidecoat such that positive airflow into the controlled automatic bells section occurs whenever EU-Guidecoat is in use. Positive airflow shall be demonstrated according to a method acceptable to the AQD District Supervisor.² (R 336.1702(a), R 336.2810, & 40 CFR 52.21)
- The permittee shall install and properly operate the carbon adsorption unit which precedes Thermal Oxidizer No. 2 in accordance with the approved periodic monitoring plan.² (R 336.1205, R 336.1224, R 336.1225, R 336.1702(a), R 336.1910, R 336.2810 & 40 CFR 52.21)

Formatted: Font: 10 pt

IV. DESIGN/EQUIPMENT PARAMETER(S)

1. The permittee shall not operate Zone 1 of the automatic bells section of the guidecoat booth portion of EU-Guidecoat unless Thermal Oxidizer No. 2 is installed, maintained and operated in a satisfactory manner. Satisfactory operation of the thermal oxidizer includes maintaining a minimum combustion chamber temperature of 1400 °F and a minimum retention time of 0.5 seconds. In lieu of a minimum temperature, an average temperature of 1400 °F based upon a three-hour rolling average may be used.² (R 336.1224, R 336.1225, R 336.1702(a), R 336.1910, R 336.2810 & 40 CFR 52.21)
2. The permittee shall not operate the guidecoat curing oven portion of EU-Guidecoat unless Thermal Oxidizer No. 1 is installed, maintained and operated in a satisfactory manner. Satisfactory operation of the thermal oxidizer includes maintaining a minimum combustion chamber temperature of 1400 °F and a minimum retention time of 0.5 seconds. In lieu of a minimum temperature, an average temperature of 1400 °F based upon a three-hour rolling average may be used.² (R 336.1224, R 336.1225, R 336.1702(a), R 336.1910, R 336.2810 & 40 CFR 52.21)

V. TESTING/SAMPLING

Records shall be maintained on file for a period of five years. (R 336.1213(3)(b)(ii))

1. The VOC content, ~~water content and density~~ of any coating or material as applied and as received, shall be determined using federal Reference Test Method 24 or an alternative method approved by the AQD District Supervisor. Alternatively, for waterborne materials, the VOC content may be determined from manufacturer's formulation data. If the Method 24 and the formulation values should differ, the Method 24 results shall be used to determine compliance. Upon request of the District Supervisor, the VOC content, ~~water content and density~~ of any coating or material shall be verified using federal Reference Test Method 24.² (R 336.1702(a), R 336.2001, R 336.2003, R 336.2004, R 336.2810 & 40 CFR 52.21)

See Appendix 5

VI. MONITORING/RECORDKEEPING

Records shall be maintained on file for a period of five years. (R 336.1213(3)(b)(ii))

1. The permittee shall install, calibrate, maintain and operate in a satisfactory manner a temperature monitoring device in the combustion chamber of Thermal Oxidizer No. 1 to monitor and record the temperature on a continuous basis, during operation of EU-Guidecoat. Temperature data recording shall consist of measurements made at equally spaced intervals, not to exceed 15 minutes per interval.² (R 336.1205, R 336.1224, R 336.1225, R 336.1702(a), R 336.2810, 40 CFR 52.21, 40 CFR 60.13 & 40 CFR 60.390)
2. The permittee shall install, calibrate, maintain and operate in a satisfactory manner a temperature monitoring device in the combustion chamber of Thermal Oxidizer No. 2 to monitor and record the temperature on a continuous basis, during operation of EU-Guidecoat. Temperature data recording shall consist of measurements made at equally spaced intervals, not to exceed 15 minutes per interval.² (R 336.1205, R 336.1224, R 336.1225, R 336.1702(a), R 336.2810, 40 CFR 52.21, 40 CFR 60.13 & 40 CFR 60.390)
3. The permittee shall monitor the condition of the water wash particulate control system through weekly visual inspections.² (R 336.1224, R 336.1301, R 336.1331, R 336.1910, R 336.2810, 40 CFR 52.21)
4. The permittee shall keep records of visual inspections of the water wash particulate control system which include the dates and results of the inspections and the dates and reasons for repairs. All records shall be kept on file for a period of at least five years and made available to the Department upon request.² (R 336.1224, R 336.1301, R 336.1331, R 336.1910, R 336.2810, 40 CFR 52.21)

5. The permittee shall keep, in a satisfactory manner, operating temperature records for Thermal Oxidizer No. 1 as required by SC VI.1. If the measured operating temperature of Thermal Oxidizer No. 1 falls below 1400 °F during operation of EU-Guidecoat, compliance may be demonstrated based upon a three-hour average temperature, by calculating the average operating temperature for each three hour period which includes one or more temperature readings below 1400 °F. All calculations and records shall be kept on file for a period of at least five years and made available to the Department upon request.² (R 336.1205, R 336.1224, R 336.1225, R 336.1702(a), R 336.2810, 40 CFR 52.21, 40 CFR 60.13 & 40 CFR 60.390)
6. The permittee shall keep, in a satisfactory manner, operating temperature records for Thermal Oxidizer No. 2 as required by SC VI.2. If the measured operating temperature of Thermal Oxidizer No. 2 falls below 1400 °F during operation of EU-Guidecoat, compliance may be demonstrated based upon a three-hour average temperature, by calculating the average operating temperature for each three hour period which includes one or more temperature readings below 1400 °F. All calculations and records shall be kept on file for a period of at least five years and made available to the Department upon request.² (R 336.1205, R 336.1224, R 336.1225, R 336.1702(a), R 336.2810, 40 CFR 52.21, 40 CFR 60.13 & 40 CFR 60.390)

See Appendices 3, 4, and 7

VII. REPORTING

1. Prompt reporting of deviations pursuant to General Conditions 21 and 22 of Part A. (R 336.1213(3)(c)(ii))
2. Semi-annual reporting of monitoring and deviations pursuant to General Condition 23 of Part A. The report shall be postmarked or received by the appropriate AQD District Office by March 15 for reporting period July 1 to December 31 and September 15 for reporting period January 1 to June 30. (R 336.1213(3)(c)(i))
3. Annual certification of compliance pursuant to General Conditions 19 and 20 of Part A. The report shall be postmarked or received by the appropriate AQD District Office by March 15 for the previous calendar year. (R 336.1213(4)(c))

Formatted: Indent: Left: 0", Numbered + Level: 1 + Numbering Style: 1, 2, 3, ... + Start at: 4 + Alignment: Left + Aligned at: 0.25" + Indent at: 0.5"

D. FLEXIBLE GROUP CONDITIONS

Part D outlines the terms and conditions that apply to more than one emission unit. The permittee is subject to the special conditions for each flexible group in addition to the General Conditions in Part A and any other terms and conditions contained in this ROP.

The permittee shall comply with all specific details in the special conditions and the underlying applicable requirements cited. If a specific condition type does not apply, NA (not applicable) has been used in the table. If there are no special conditions that apply to more than one emission unit, this section will be left blank.

FLEXIBLE GROUP SUMMARY TABLE

The descriptions provided below are for informational purposes and do not constitute enforceable conditions.

Flexible Group ID	Flexible Group Description	Associated Emission Unit IDs
FG-Facility	This flexible group covers conditions, which apply to all of the equipment included within this permit.	All Emission Units
FG-Topcoat	See EU-Topcoat1 and 2	EU-Topcoat1, EU-Topcoat2
FG-Solvents	See EU-Purge and EU-OtherSolvents	EU-Purge, EU-OtherSolvents
FG-StorageTanks	Various liquid material storage tanks.	EU-GasTank#1, EU-GasTank#2, EU-GasTank#3, EU-DieselTank, EU-AFTank#1, EU-AFTank#2, EU-MethWWFTank#1, EU-TF_Tank, EU-PSFTank, EU-WOTank, EU-WGasTank, EU-WSolventTank,
FG-MACT <u>IIII-AUTO ASSEMBLY</u>	Emissions units covered the by auto MACT standard (40 CFR 63 Subpart IIII). On and after April 26, 2007, the permittee shall comply with all requirements of this FG.	EU-Electrocoat, EU-Guidecoat, EU-Topcoat1, EU-Topcoat2, EU-Sealers&Adhes, EU-GlassInstall, EU-Deadener, EU-Foam, EU-FinalRepair1-4, EU-SpotRepair1, EU-SpotRepair2, EU-SpotRepair3.
FG-OLD	Organic Liquid Distribution (OLD) (non-gasoline) operations at major sources of HAP emissions. Specifically, these conditions cover existing (construction pre dates April 2, 2002) liquid storage tanks which hold more than 5,000 gallons but less than 50,000 gallons and/or new liquid storage tanks which hold more than 5,000 gallons but less than 10,000 gallons of methanol/windshield washer fill solvents that are dispensed to newly assembled vehicles.	EU-MethTank#1
FG-MACT ZZZZ Existing Emergency CI <=500 HP	Existing CI Engines located at a major source <=500 HP, Emergency.	EU-Emergency Generator GA, EU-Emergency Generator Paint, EU-Emergency Diesel Fire Pump LGR, EU-Emergency Diesel Fire Pump House
FG-MACT ZZZZ – Existing Emergency CI >500 HP	Existing CI Engines located at a Major Source > 500 HP, Emergency.	EU-Emergency Generator Building 66, EU-Emergency Generator Elpo,

**FG-Facility
FLEXIBLE GROUP CONDITIONS**

DESCRIPTION

Emission Units: All Emission Units

POLLUTION CONTROL EQUIPMENT

I. EMISSION LIMIT(S)

Pollutant	Limit	Time Period/ Operating Scenario	Equipment	Monitoring/ Testing Method	Underlying Applicable Requirements
1. VOC	606 tons per year ²	12-month rolling time period as determined at the end of each calendar month.	FG-Facility	Special Condition VI.2	R 336.1225, R 336.1702(a), R 336.1901 and 40 CFR 52.21
2. VOC	264.3 tons per year ²	12-month rolling time period as determined at the end of each calendar month.	FG-Facility for production rates less than 60,000 jobs per year.	Special Condition VI.2	R 336.1225, R 336.1702(a), R 336.1901 and 40 CFR 52.21
3. VOC	5.73 pounds per job ² . ^a	12-month rolling time period as determined at the end of each calendar month.	FG-Facility for production rates 60,000 or more jobs per year.	Special Condition VI.2	R 336.1225, R 336.1702(a), R 336.1901 and 40 CFR 52.21
4. NOx	36.5 tons per year ²	12-month rolling time period as determined at the end of each calendar month.	FG-Facility	Special Condition VI.2	R 336.1205 and R 336.1901

^a In accordance with Rule 213(2) and Rule 213(6), compliance with this streamlined VOC emission limit shall be considered compliance with the VOC emission limit established by **R 336.1225, R 336.1702(a) and 40 CFR 52.21** and also compliance with the VOC emissions limit in **40 CFR 60.392**, an additional applicable requirement that has been subsumed within this condition.

II. MATERIAL LIMIT(S)

- The total natural gas usage shall not exceed a maximum 769 million cubic feet per year. Compliance with the cubic feet per year limit is based on a rolling time period of 12 consecutive calendar months as determined at the end of each month.² (**R 336.1205 and 40 CFR 52.21(c) and (d)**)

III. PROCESS/OPERATIONAL RESTRICTION(S)

- The permittee shall not operate the two automatic clearcoat, two automatic clearcoat bells and one automatic prime bells spray booth portions unless the rotary concentrator is installed, maintained and operated in a satisfactory manner. Satisfactory operation of the rotary concentrator includes maintaining a minimum desorption temperature above the most recent acceptable performance test value minus 15 degrees Fahrenheit and can be based upon a 3-hour average. (**64.6(c)(1)(i),(ii), R 336.1213(3)**)
- The permittee shall not operate the Electrocoat dip tank, the Electrocoat cure oven, the guidecoat curing oven, and the two topcoat curing ovens unless Thermal Oxidizer No. 1 is installed, maintained and operated in a satisfactory manner. Satisfactory operation of the thermal oxidizer includes maintaining a minimum combustion chamber temperature of 1400 °F and a minimum retention time of 0.5 seconds. In lieu of a minimum

Formatted: Font: 10 pt

temperature, an average temperature of 1400 °F based upon a three-hour rolling average may be used.^{2,b}
(R 336.1205, R 336.1224, R 336.1225, R 336.1702(a), R 336.1910 & 40 CFR 52.21, 64.6(c)(1)(i),(ii))

3. The permittee shall not operate the automatic guidecoat bells, the two basecoat heated flash-off areas, the two automatic clearcoat robots sections, and the two automatic clearcoat bell sections unless Thermal Oxidizer No. 2 is installed, maintained and operated in a satisfactory manner. Satisfactory operation of the thermal oxidizer includes maintaining a minimum combustion chamber temperature of 1400 °F and a minimum retention time of 0.5 seconds. In lieu of a minimum temperature, an average temperature of 1400 °F based upon a three-hour rolling average may be used.^{2,b} (R 336.1205, R 336.1224, R 336.1225, R 336.1702(a), R 336.1910 & 40 CFR 52.21, 64.6(c)(1)(i),(ii))

^b In accordance with Rule 213(2) and Rule 213(6), compliance with this streamlined VOC monitoring condition shall be considered compliance with the VOC monitoring condition established by R 336.1225 and R 336.1702(a); and also compliance with the VOC monitoring conditions in 40 CFR 60.393, an additional applicable requirement that has been subsumed within this condition.

IV. DESIGN/EQUIPMENT PARAMETER(S)

1. The permittee shall equip and maintain each spray coating operation which directly vents to the outdoor air with exhaust filters or water wash particulate controls.² (R 336.1301, R 336.1331, R 336.1901 and 40 CFR 52.21)

V. TESTING/SAMPLING

Records shall be maintained on file for a period of five years. (R 336.1213(3)(b)(ii))

1. The VOC content, ~~water content and density~~ of any coating or material as applied and as received, shall be determined using federal Reference Test Method 24, or an alternative method approved by the AQD District Supervisor. Alternatively, ~~for waterborne materials~~, the VOC content may be determined from manufacturer's formulation data. If the Method 24 and the formulation values should differ, the Method 24 results shall be used to determine compliance. Upon request of the District Supervisor, the VOC content, ~~water content and density~~ of any coating or material shall be verified using federal Reference Test Method 24.² (R 336.1313(3))

See Appendix 5

VI. MONITORING/RECORDKEEPING

Records shall be maintained on file for a period of five years. (R 336.1213(3)(b)(ii))

1. In order to maintain the flexibility provided under this permit, changes allowed under Conditions IX.3 or IX.4 may be made as minor permit modifications to the Renewable Operating Permit (ROP) pursuant to R 336.1216(2). Additionally, corresponding changes made to any existing testing, monitoring, record keeping or other compliance evaluation activities may also be made as minor permit modifications to the ROP pursuant to R 336.1216(2) unless they represent a significant change in monitoring (e.g., relaxation in the frequency of the existing testing, monitoring, record keeping or other compliance evaluation activity).² (R 336.1225, R 336.1301, R 336.1331, R 336.1702(a), R 336.1901 and 40 CFR 52.21)
2. The permittee shall keep the following records/calculations in a format acceptable to the AQD District Supervisor.
 - a. For each material used in FG-Facility:^c
 - i. Material identification;
 - ii. Material VOC content; and,
 - iii. Material usage.
 - b. Number of jobs each calendar month, where a job is defined as a completely assembled vehicle off the final assembly line.^c
 - c. Calculations showing the monthly and annual mass VOC emission rates, in tons per month and tons per 12-month rolling time period, as determined at the end of each calendar month. Calculations must show the capture and control efficiency of each control device used.^c

202247

ROP No: MI-ROP-[A1641A1641](#)

Formatted: Font: 10 pt

Expiration Date: November 20, 2022

PTI No.: MI-PTI-[A1641A1641-202247](#)

Formatted: Font: 10 pt

- d. Calculations showing the VOC emission rate (lb/job) on a 12-month rolling basis, as determined at the end of each calendar month.^c
- e. Records of the total natural gas used during each calendar month, in cubic feet, and the portion of that total used combined by all of the paint booth air supply houses.
- f. Calculations showing the monthly and annual mass NO_x emission rates in tons per month and tons per 12-month rolling time period performed according to an acceptable method.

As an alternative, the permittee may keep other records acceptable to the AQD District Supervisor. All records/calculations shall be kept on file for a period of at least five years and made available to the Department upon request.² (R 336.1225, R 336.1702(a), 40 CFR 52.21)

3. Permittee shall monitor or secure the valve or closure mechanism controlling each bypass line for each capture system in a non-bypass mode such that the valve or closure mechanism cannot be opened without creating a record that it was opened. The method used to monitor or secure the valve or closure mechanism must meet one of the following:
 - a. Flow control position indicator.
 - b. Car-seal or lock-and-key valve.
 - c. Valve closure monitoring.
 - d. Automatic shutdown system.If any bypass line is opened, a description of why the line was opened and the length of time it remained open must be included in the semi-annual compliance reports required in Special Condition No. VII.2. (64.3(a)(2), R 336.1213(3))
4. The permittee shall install, calibrate, maintain and operate in a satisfactory manner a temperature monitoring device to determine the concentrator desorption gas inlet temperature on a continuous basis, during operation of FG-Topcoat. Desorption gas inlet temperature data recording shall consist of measurements made at equally spaced intervals, not to exceed 15 minutes per interval.^b (64.6(c)(1)(i),(ii), R 336.1213(3))
5. The permittee shall keep records of maintenance inspections for the rotary concentrator(s) which include the dates and results of the inspections and the dates and reasons for repairs. The following items listed below shall be inspected as follows:
 - a. Observe and record an indicator of performance for the desorption fan on a monthly basis.
 - b. Observe and record an indicator of wheel rotation for the concentrator on a monthly basis.
 - c. Observe and record the pressure drop across the concentrator on a monthly basis.
 - d. Observe the adsorbent materials for any contamination and/or erosion on an annual basis.All records shall be kept on file for a period of at least five years and made available to the Department upon request. (64.6(c)(1)(i),(ii), R 336.1213(3))
6. The permittee shall keep records of maintenance inspections for the thermal oxidizer which include the dates and results of the inspections and the dates and reasons for repairs. The following items listed below shall be inspected at least annually:
 - a. Verify the condition of the heat exchanger and/or heat transfer media on an annual basis.
 - b. Verify valve seal synchronization and inspection of valve seal(s) condition on an annual basis.All records shall be kept on file for a period of at least five years and made available to the Department upon request. (64.6(c)(1)(i),(ii), R 336.1213(3))

See Appendix 7

^c In accordance with Rule 213(2) and Rule 213(6), compliance with this streamlined VOC recordkeeping condition shall be considered compliance with the VOC monitoring condition established by R 336.1225 and R 336.1702(a); and also compliance with the VOC monitoring conditions in 40 CFR 60.393, an additional applicable requirement that has been subsumed within this condition.

VII. REPORTING

1. Prompt reporting of deviations pursuant to General Conditions 21 and 22 of Part A. **(R 336.1213(3)(c)(ii))**
2. Semi-annual reporting of monitoring and deviations pursuant to General Condition 23 of Part A. The report shall be postmarked or received by the appropriate AQD District Office by March 15 for reporting period July 1 to December 31 and September 15 for reporting period January 1 to June 30.^d **(R 336.1213(3)(c)(i))**
3. Annual certification of compliance pursuant to General Conditions 19 and 20 of Part A. The report shall be postmarked or received by the appropriate AQD District Office by March 15 for the previous calendar year. **(R 336.1213(4)(c))**
- ~~4.~~ 4.—Each semi-annual report of monitoring and deviations shall include summary information on the number, duration and cause of excursions/exceedances and the corrective actions taken. If there were no excursions/exceedances in the reporting period, then this report shall include a statement that there were no excursions/exceedances. **(40 CFR 64.9(a)(2)(i), R 336.213(3)(c))**

Formatted: Indent: First line: 0"

See Appendix 8

^d In accordance with Rule 213(2) and Rule 213(6), compliance with this streamlined reporting condition shall be considered compliance with the reporting condition established by **R 336.1213(3)(c)(i)**; and also compliance with the VOC reporting condition in **40 CFR 60.395**, an additional applicable requirement that has been subsumed within this condition.

VIII. STACK/VENT RESTRICTION(S)

The exhaust gases from the stacks listed in the table below shall be discharged unobstructed vertically upwards to the ambient air unless otherwise noted:

Stack & Vent ID	Maximum Exhaust Dimensions (inches)	Minimum Height Above Ground (feet)	Underlying Applicable Requirements
NA			

IX. OTHER REQUIREMENT(S)

- The emission and performance limits listed in Conditions I.1 through I.4 have been determined to be at least as stringent as, and replace, the individual emission unit-specific limits of PTI No. 134-99G which were established under MDEQEGLE Rules and federal NSR regulations. Compliance with the limits established in Conditions I.1 through I.4 constitutes compliance with the MDEQEGLE Rules and federal NSR regulations that formed the basis for the limits of PTI No. 134-99G.² (R 336.1225, R 336.1702(a), R 336.1901 and 40 CFR 52.21)
- MDEQEGLE has determined that compliance with the limits listed in Conditions I.1 through I.4 provides a level of control that is at least equivalent to and not less stringent than the standards in 40 CFR 60.392, et seq. Accordingly, compliance with the limitations in this permit meets all applicable requirements of 40 CFR Part 60, Subpart MM.² (40 CFR 60, Subpart MM)
- This permit authorizes any activities including projects involving physical changes or changes in the method of operation to existing emission units that do not require an increase in the emissions limits or performance levels specified in Conditions I.1 through I.4. Such activities do not require the facility to obtain any federal or state air permits.² (R 336.1201)
- ~~This permit authorizes projects involving the installation of new emission units that do not require an increase in the emissions limits or performance levels specified in Conditions I.1 through I.4 under the following conditions:~~
 - As a state-only enforceable requirement, the new emission unit will not result in a meaningful change in the nature or quantity of toxic air contaminants emitted from the stationary source. The permittee must demonstrate to the department that a meaningful change in the nature or quantity of toxic air contaminants has not occurred. The permittee may devise its own method to perform this demonstration subject to approval by the department. However, if the permittee demonstrates that all toxic air contaminant emissions from a new emissions unit are within the levels specified in R 336.1226 or R 336.1227, a meaningful change in toxic air contaminants has not occurred;
 - The new emissions unit will not be a newly constructed or reconstructed major source of hazardous air pollutants as defined in and subject to 40 C.F.R. §63.2 and §63.5(b)(3), National Emission Standard for Hazardous Air Pollutants; and,
 - The installation of the new emissions unit will not cause the violation of any applicable air requirement not otherwise referenced in Condition IX.1.

Commented [JH1]: Disregard the deletion of 4.

Formatted: Indent: Left: 0", Hanging: 0.25", No bullets or numbering

A demonstration that the new installation meets these criteria shall be kept on site for the life of the new emissions unit and made available to the department upon request. The permittee must notify the department of the installation of the new emission unit. This notification must contain the information specified in R 336.1215(3)(c)(i) through (v). Construction of the new emission unit may commence upon submittal of the notice.² (R 336.1201)

- The emission limits and performance levels specified in Conditions I.1 through I.4 may be reviewed and adjusted when newly applicable federal requirements or any other requirement that is enforceable as a practical matter and that the department, under its State Implementation Plan, may impose on the facility become applicable during the term of the permit that would lower allowable emissions. Adjustments to Conditions I.1 through I.4 will be made through a permit revision as of the final compliance date of the new applicable requirements and will reflect the impact the new applicable requirements will have on the affected

20~~22~~17

ROP No: MI-ROP-~~A1641A1641-~~

Formatted: Font: 10 pt

Expiration Date: November 20, 2022

PTI No.: MI-PTI-~~A1641A1641-~~20~~22~~17

Formatted: Font: 10 pt

emission units. Initial compliance with the adjusted emission limits and performance levels will be demonstrated over the first 12-month period after the final compliance date of the new applicable requirements. (R 336.1225, R 336.1702(a), R 336.1901 and 40 CFR 52.21)²

6. The permittee may, at any time, request that ~~MDEQEGLE~~ terminate the flexible emission limit provisions of this permit and issue a traditional permit. In the event of such termination, the requirements of this ROP shall remain in effect until a valid replacement ROP is issued. At that time, the permit conditions for any emission unit that has not been modified and to which new requirements have not become applicable will revert to those found in PTI No. 134-99G. For any modified emission unit, or any emission unit for which new requirements have become applicable the permit conditions will reflect requirements contemporaneous with the date of such modification or new requirement applicability. (R 336.1225, R 336.1702(a), R 336.1901 and 40 CFR 52.21)²
7. For the purposes of Compliance Assurance Monitoring (CAM), excursions will be defined as follows: (40 CFR 64.6(c)(2))
 - a. A temperature excursion is defined as a confirmed three-hour period during which the average fails to meet the specified temperature requirements in special conditions III.1, III.2, and III.3
 - b. A monitoring excursion is defined as a failure to properly monitor as required in special conditions VI.3 and VI.4
 - c. An inspection excursion is defined as failure to complete an inspection required in special conditions VI.5 and VI.6.

Footnotes:

¹This condition is state only enforceable and was established pursuant to Rule 201(1)(b).

²This condition is federally enforceable and was established pursuant to Rule 201(1)(a).

FG-Topcoat FLEXIBLE GROUP CONDITIONS

DESCRIPTION

Two parallel topcoat spray systems which consist of a spray booth followed by a curing oven. There is a heated flash-off area located between the basecoat portion of the booth and the clearcoat portion of the booth. The waterborne basecoat is applied automatically with electrostatic bell and electrostatic robot applicators or equivalent. The solvent borne clearcoat is applied automatically with electrostatic bell and electrostatic robot applicators or equivalent.

Emission Units: EU-Topcoat1, & EU-Topcoat2

POLLUTION CONTROL EQUIPMENT

The topcoat booths are equipped with a wet eliminator system to control particulate emissions from paint overspray. VOC emissions from the two automatic clearcoat sections of the topcoat booths and the flash-off area are controlled by thermal oxidizer No. 2. VOC emissions from the topcoat curing ovens are controlled by thermal oxidizer No. 1.

Note: VOC emissions from the electrocoat dip tank and the electrocoat curing oven, the guidecoat curing oven, and topcoat curing oven No. 2 are also controlled by thermal oxidizer No. 1.

Note: VOC emissions from an automatic bells section of the guidecoat booth, the heated flash and the two automatic clearcoat sections of topcoat booth No. 2 are also controlled by thermal oxidizer No. 2.

I. EMISSION LIMIT(S)

Pollutant	Limit	Time Period/ Operating Scenario	Equipment	Monitoring/ Testing Method	Underlying Applicable Requirements
NA					

II. MATERIAL LIMIT(S)

Material	Limit	Time Period/ Operating Scenario	Equipment	Monitoring/ Testing Method	Underlying Applicable Requirements
NA					

III. PROCESS/OPERATIONAL RESTRICTION(S)

- The permittee shall operate each automatic clearcoat robot section and each automatic clearcoat bell section of both topcoat booths such that positive airflow into the controlled automatic sections occurs whenever FG-Topcoat is in use. Positive airflow shall be demonstrated according to a method acceptable to the AQD District Supervisor.² (R 336.1702(a) & 40 CFR 52.21)
- The permittee shall install and properly operate the carbon adsorption unit which precedes Thermal Oxidizer No. 2 in accordance with the approved periodic monitoring plan.² (R 336.1205, R 336.1224, R 336.1225, 336.1702(a), R 336.1910 & 40 CFR 52.21)

IV. DESIGN/EQUIPMENT PARAMETER(S)

1. The permittee shall not operate the two topcoat curing ovens portion of FG-Topcoat unless Thermal Oxidizer No. 1 is installed, maintained and operated in a satisfactory manner. Satisfactory operation of the thermal oxidizer includes maintaining a minimum combustion chamber temperature of 1400 °F and a minimum retention time of 0.5 seconds. In lieu of a minimum temperature, an average temperature of 1400 °F based upon a three-hour rolling average may be used.² (R 336.1205, R 336.1224, R 336.1225, R 336.1702(a), R 336.1910 & 40 CFR 52.21)
2. The permittee shall not operate the two basecoat heated flash-off areas, the two automatic clearcoat robots sections, and the two automatic clearcoat bells sections portions of FG-Topcoat unless Thermal Oxidizer No. 2 is installed, maintained and operated in a satisfactory manner. Satisfactory operation of the thermal oxidizer includes maintaining a minimum combustion chamber temperature of 1400 °F and a minimum retention time of 0.5 seconds. In lieu of a minimum temperature, an average temperature of 1400 °F based upon a three-hour rolling average may be used.² (R 336.1205, R 336.1224, R 336.1225, R 336.1702(a), R 336.1910 & 40 CFR 52.21)

V. TESTING/SAMPLING

Records shall be maintained on file for a period of five years. (R 336.1213(3)(b)(ii))

1. The VOC content, ~~water content and density~~ of any coating or material as applied and as received, shall be determined using federal Reference Test Method 24 or an alternative method approved by the AQD District Supervisor. Alternatively, ~~for waterborne materials,~~ the VOC content may be determined from manufacturer's formulation data. If the Method 24 and the formulation values should differ, the Method 24 results shall be used to determine compliance. Upon request of the District Supervisor, the VOC content, ~~water content and density~~ of any coating or material shall be verified using federal Reference Test Method 24.² (R 336.1702(a), R 336.2001, R 336.2003, R 336.2004 & 40 CFR 52.21)

See Appendix 5

VI. MONITORING/RECORDKEEPING

Records shall be maintained on file for a period of five years. (R 336.1213(3)(b)(ii))

1. The permittee shall install, calibrate, maintain and operate in a satisfactory manner a temperature monitoring device in the combustion chamber of Thermal Oxidizer No. 1 to monitor and record the temperature on a continuous basis, during operation of FG-Topcoat. Temperature data recording shall consist of measurements made at equally spaced intervals, not to exceed 15 minutes per interval.² (R 336.1205, R 336.1224, R 336.1225, R 336.1702(a), 40 CFR 52.21, 40 CFR 60.13 & 40 CFR 60.390)
2. The permittee shall install, calibrate, maintain and operate in a satisfactory manner a temperature monitoring device in the combustion chamber of Thermal Oxidizer No. 2 to monitor and record the temperature on a continuous basis, during operation of FG-Topcoat. Temperature data recording shall consist of measurements made at equally spaced intervals, not to exceed 15 minutes per interval.² (R 336.1205, R 336.1224, R 336.1225, R 336.1702(a), 40 CFR 52.21, 40 CFR 60.13 & 40 CFR 60.390)
3. The permittee shall monitor the condition of the water wash particulate control system through weekly visual inspections.² (R 336.1224, R 336.1301, R 336.1331, R 336.1910, 40 CFR 52.21)
4. The permittee shall keep records of visual inspections of the water wash particulate control system which include the dates and results of the inspections and the dates and reasons for repairs. All records shall be kept on file for a period of at least five years and made available to the Department upon request.² (R 336.1224, R 336.1301, R 336.1331, R 336.1910, 40 CFR 52.21)

Formatted: Font: 10 pt

5. The permittee shall keep, in a satisfactory manner, operating temperature records for Thermal Oxidizer No. 1 as required by special condition IV.1. If the measured operating temperature of Thermal Oxidizer No. 1 falls below 1400 °F during operation of FG-Topcoat, compliance may be demonstrated based upon a three-hour average temperature, by calculating the average operating temperature for each three hour period which includes one or more temperature readings below 1400 °F. All calculations and records shall be kept on file for a period of at least five years and made available to the Department upon request.² (R 336.1205, R 336.1224, R 336.1225, R 336.1702(a), 40 CFR 52.21, 40 CFR 60.13 & 40 CFR 60.390)
6. The permittee shall keep, in a satisfactory manner, operating temperature records for Thermal Oxidizer No. 2 as required by special condition IV.2. If the measured operating temperature of Thermal Oxidizer No. 2 falls below 1400 °F during operation of FG-Topcoat, compliance may be demonstrated based upon a three-hour average temperature, by calculating the average operating temperature for each three hour period which includes one or more temperature readings below 1400 °F. All calculations and records shall be kept on file for a period of at least five years and made available to the Department upon request.² (R 336.1205, R 336.1224, R 336.1225, R 336.1702(a), 40 CFR 52.21, 40 CFR 60.13 & 40 CFR 60.390)

VII. REPORTING

1. Prompt reporting of deviations pursuant to General Conditions 21 and 22 of Part A. (R 336.1213(3)(c)(ii))
2. Semi-annual reporting of monitoring and deviations pursuant to General Condition 23 of Part A. The report shall be postmarked or received by the appropriate AQD District Office by March 15 for reporting period July 1 to December 31 and September 15 for reporting period January 1 to June 30. (R 336.1213(3)(c)(i))
3. Annual certification of compliance pursuant to General Conditions 19 and 20 of Part A. The report shall be postmarked or received by the appropriate AQD District Office by March 15 for the previous calendar year. (R 336.1213(4)(c))

See Appendix 8

VIII. STACK/VENT RESTRICTION(S)

The exhaust gases from the stacks listed in the table below shall be discharged unobstructed vertically upwards to the ambient air unless otherwise noted:

Stack & Vent ID	Maximum Exhaust Dimensions (inches)	Minimum Height Above Ground (feet)	Underlying Applicable Requirements
1. Topcoat Solvent Wipe & Manual Tack-Off Operations (D2)	49.0 ²	127.0 ²	R 336.1225, 40 CFR 52.21 (c) & (d)

**FG-MACT IIII-AUTO ASSEMBLY
FLEXIBLE GROUP CONDITIONS**

DESCRIPTION

~~Each new, reconstructed, or existing affected source as defined in Title 40 of the Code of Federal Regulations (CFR), Part 63.3082, that is located at a facility which applies topcoat to new automobile or new light duty truck bodies or body parts for new automobiles or new light duty trucks; AND/OR in which you choose to include, pursuant to 40 CFR 63.3082(c), any coating operations which apply coatings to new other motor vehicle bodies or body parts for new other motor vehicles; parts intended for use in new automobiles, new light duty trucks or new other motor vehicles; or aftermarket repair or replacement parts for automobiles, light duty trucks or other motor vehicles; and that is a major source, is located at a major source, or is part of a major source of emissions of hazardous air pollutants (HAPs) except as provided in 63.3081(c). This includes equipment covered by other permits, grandfathered equipment, and exempt equipment.~~

~~Each new, reconstructed, or existing affected source as defined in 40 CFR 63.3082, that is located at a facility which applies topcoat to new automobile or new light duty truck bodies or body parts, and that is a major source, is located at a major source, or is part of a major source of emissions of hazardous air pollutants (HAPs) except as provided in 63.3081(c). This includes equipment covered by other permits, grandfathered equipment, and exempt equipment.~~

The date by which the permittee must comply with the conditions of FG-MACT is as follows:

- ~~For a new or reconstructed source whose initial startup date was before June 25, 2004, the compliance date is June 25, 2004. (40 CFR 63.3083(a))~~
- ~~For a new or reconstructed source whose initial startup date is after June 25, 2004, the compliance date is the date of initial startup of the affected source. (40 CFR 63.3083(a))~~
- ~~For an existing affected source, the compliance date is April 26, 2007. (40 CFR 63.3083(b))~~

~~Flexible Group ID Emission Units: EU-Electrocoat, EU-Guidecoat, EU-Topcoat1, EU-Topcoat2, EU-Sealers&Adhes, EU-GlassInstall, EU-Deadener, EU-Foam, EU-FinalRepair1- 4, EU-SpotRepair1, EU-SpotRepair2, EU-SpotRepair3~~

POLLUTION CONTROL EQUIPMENT

~~NA
VOC emissions from the two automatic clearcoat sections of the topcoat booths and the flash-off area are controlled by thermal oxidizer No. 2. VOC emissions from the topcoat curing ovens are controlled by thermal oxidizer No. 1.~~

~~Note: VOC emissions from the electrocoat dip tank and the electrocoat curing oven, the guidecoat curing oven, and topcoat curing oven No. 2 are also controlled by thermal oxidizer No. 1.~~

~~Note: VOC emissions from the automatic bells section of the guidecoat booth, the heated flash and the two automatic clearcoat sections of topcoat booth No. 2 are also controlled by thermal oxidizer No. 2.~~

I. EMISSION LIMIT(S)

5. The permittee may choose to comply with either Special Conditions ~~Nos.~~ I.1 or I.2. The permittee may choose to comply with Special Condition I.2. Special Condition No. I.2 may be chosen only if Electrocoat system (EU-Electrocoat~~ECOAT~~) meets either of the following requirements. (40 CFR Part 63 Subpart IIII, Table 5, 40 CFR 63.3092)
- Each individual material added to the Electrocoat system contains no more than 1.0 percent by weight of any organic HAP and no more than 0.10 percent by weight of any organic HAP in Table 5 of 40 CFR 63 Subpart IIII, OSHA-defined carcinogenic organic HAP, or
 - The emissions from all Electrocoat bake ovens are captured and ducted to a CONTROL DEVICE having a minimum destruction or removal efficiency of at least 95 percent (by weight).

II. MATERIAL LIMIT(S)

NA

III. PROCESS/OPERATIONAL RESTRICTION(S)

- The permittee shall develop and implement a work practice plan to minimize the organic HAP emissions from the storage, mixing and conveying of coatings, thinners, and cleaning materials used in, and waste materials generated by all coating operations for which an emission limit has been established under Special Conditions ~~Nos.~~ I.1 through I.4. The work practice plan must specify practices and procedures to ensure that, at a minimum, the following elements are implemented consistent with the requirements of 40 CFR 63.3094: The permittee shall comply with the applicable work practice plans at all times.
 - All organic-HAP-containing coatings, thinners, cleaning materials, and waste materials must be stored in closed containers.
 - Spills of organic-HAP containing coatings, thinners, cleaning materials, and waste materials must be minimized.
 - Organic-HAP-containing coatings, thinners, cleaning materials, and waste materials must be conveyed from one location to another in closed containers or pipes.
 - Mixing vessels, other than day tanks equipped with continuous agitation systems, which contain organic-HAP-containing coatings and other materials must be closed except when adding to, removing, or mixing the contents.
 - Emissions of organic HAP must be minimized during cleaning of storage, mixing, and conveying equipment.
 - Organic HAP emissions from cleaning and from purging of equipment associated with all coating operations subject to emission limits in Special Conditions Nos. I.1 through I.4 above must be minimized by addressing:
 - Vehicle body wipe pursuant to 40 CFR 63.3094(c)(1)(i);
 - Coating line purging pursuant to 40 CFR 63.3094(c)(1)(ii);
 - Coating system flushing pursuant to 40 CFR 63.3094(c)(1)(iii);
 - Cleaning of spray booth grates pursuant to 40 CFR 63.3094(c)(1)(iv);
 - Cleaning of spray booth walls pursuant to 40 CFR 63.3094(c)(1)(v);
 - Cleaning of spray booth equipment pursuant to 40 CFR 63.3094(c)(1)(vi);
 - Cleaning of external spray booth areas pursuant to 40 CFR 63.3094(c)(1)(vii);
 - Additional housekeeping measures pursuant to 40 CFR 63.3094(c)(1)(viii).
- The permittee may choose to comply with an alternative to the work practice standard, after receiving prior approval from the USEPA in accordance with 40 CFR 63.6(g). **(40 CFR 63.3100(c), 40 CFR 63.4493(b) and (c))**
- The work practice plan shall not become part of the facility's Renewable Operating Permit (ROP). Revisions to the work practice plan likewise do not represent revisions to the facility's ~~ROP~~ Renewable Operating Permit. Copies of the current work practice plan and any earlier plan developed within the past 5 years are required to be made available for inspection and copying by the ~~AQD~~ Air Quality Division upon request.² **(40 CFR 63.3094)**

4. ~~For any coating operation(s) for which HAP emission reductions due to the use of add-on control equipment are relied upon to demonstrate compliance with the emission limits in Special Condition Nos. 1.1 through 1.4 above, the permittee shall meet the operating limits specified in Table 1 of 40 CFR 63 Subpart IIII as identified below. The operating limits in Table 1 apply to the emission capture and add-on control systems on the coating operations. The permittee must establish the operating limits during the performance test according to the requirements in 40 CFR 63.3167. The operating limits shall be met at all times after they are established, except for periods of startup, shutdown and malfunction. (40 CFR 63.3093, 40 CFR 63.3100(b), (d) and Table 1)~~

Add-On Control Device:	Operating Limit:
Thermal Oxidizer	The average combustion temperature in any 3-hour period must not fall below the combustion temperature limit established according to 40 CFR 63.3167(a).
Concentrators, Including Zeolite Wheels and Rotary Carbon Adsorbers	The average desorption gas inlet temperature in any 3-hour period must not fall below the limit established according to 40 CFR 63.3167(e).

Formatted: Justified, Indent: Left: 0", Hanging: 0.25"

Formatted: Justified, Indent: Left: 0", Hanging: 0.25"

5. ~~The permittee shall develop and implement a written startup, shutdown and malfunction plan (SSMP) in accordance with 40 CFR 63.6(e)(3). This plan must address the startup, shutdown and corrective actions in the event of a malfunction of any emission capture system or add-on control device upon which compliance with any of the emission limits in Special Condition Nos. 1.1 through 1.4 depends. The SSMP must also address any coating operation equipment that may cause increased emissions or that would affect capture efficiency if the process equipment malfunctions, such as conveyors that move parts among enclosures.² (40 CFR 63.3100(f))~~
6. ~~The permittee shall operate and maintain FG-MACT including any emission capture system or add-on control device upon which compliance with any of the emission limits in Special Condition Nos. 1.1 through 1.4 depends according to the provisions in 40 CFR 63.6(e)(1)(i). (40 CFR 63.3100(d))~~
7. ~~The permittee shall maintain a log detailing the operation and maintenance of any emission capture system, add-on control device, or continuous parameter monitor upon which compliance with any of the emission limits in Special Condition Nos. 1.1 through 1.4 depends. The log shall cover the period between the compliance date specified in 40 CFR 63.3083 and the date when the initial emission capture system and add-on control device performance tests have been completed, as specified in 40 CFR 63.3160. (40 CFR 63.3100(e))~~

IV. DESIGN/EQUIPMENT PARAMETER(S)

NA

V. TESTING/SAMPLING

Records shall be maintained on file for a period of five years.² (R 336.1213(3)(b)(ii), 40 CFR 63.3130, 40 CFR 63.3131)

1. The permittee shall perform the applicable performance tests and compliance demonstrations in accordance with 40 CFR 63.3150-3152, 40 CFR 63.3160-3161, 40 CFR 63.3163-3168, 40 CFR 63.3170-3171, and 40 CFR 63.3173. (40 CFR Part 63, Subpart IIII)
2. The permittee may rely upon the results of capture, destruction or transfer efficiency tests that have been previously conducted upon written approval from the AQD District Supervisor. Any such previous tests must meet the criteria identified in 40 CFR 63.3160(c)(1) through (3). (40 CFR 63.3160)
3. The permittee shall determine the mass fraction of each organic HAP for each material used according to the procedures established under 40 CFR 63.3151(a)(1) through (5). The permittee may use USEPA Method ALT-017 as an alternative for any material used, after demonstrating that its use as an alternative test

202217

methodology for that material, has been approved by the USEPA pursuant to the requirements of 40 CFR 63.3151(a)(3) and 40 CFR 63.7. **(40 CFR 63.7, 40 CFR 63.3151)**

See Appendix 5

VI. MONITORING/RECORDKEEPING

Records shall be maintained on file for a period of five years.² **(R 336.1213(3)(b)(ii), 40 CFR 63.3131)**

1. The permittee shall compile all required records and complete all required calculations in a format acceptable to the AQD District Supervisor and make them available by the end of the calendar month following each compliance period unless otherwise specified in any monitoring/recordkeeping condition. **(R 336.1213(3))**
- ~~2. The permittee shall conduct an initial compliance demonstration for the initial compliance period described in 40 CFR 63.3150-3154, 40 CFR 63.3160-3164, and 40 CFR 63.3170-3174. The initial compliance period begins on the applicable compliance date specified in 40 CFR 63.3083 and ends on the last day of the month following the compliance date. If the initial date occurs on any day other than the first day of a month, then the initial compliance period extends through the end of that month plus the next month.² **(40 CFR 63.3150, 40 CFR 63.3160, 40 CFR 63.3170, 40 CFR 63.3083(a) and (b))**~~
- ~~3. The permittee shall install, operate and maintain each continuous parametric monitoring system in accordance with the applicable provisions of 40 CFR 63.3168.² **(40 CFR 63.3168)**~~
- ~~4. The permittee shall keep all records as required by 40 CFR 63.3130 in the format and timeframes outlined in 40 CFR 63.3131. **(40 CFR 63.3152(c), 40 CFR 63.3163(j))****(40 CFR 63.3130, 40 CFR 63.3134)**~~
- ~~5. The permittee shall maintain, at a minimum, the following records as of the applicable compliance date, for each compliance period:
 - a. A copy of each notification and report that is submitted to comply with 40 CFR Part 63, Subpart IIII and the documentation supporting each notification and report, ~~as specified in 40 CFR 63.3130(a).~~ **(40 CFR 63.3130(a))**
 - b. A current copy of information provided by materials suppliers or manufactures, such as manufacturer's formulation data, or test data used to determine the mass fraction of organic HAP for each coating, thinner and cleaning material, the density for each coating and thinner, and the volume fraction of coating solids for each coating. **(40 CFR 63.3130(b))**
 - c. For each coating or thinner used in FG-MACT IIII-AUTO ASSEMBLY or FG-MACT IIII-AUTO ASSEMBLY WITH ECOAT, the volume used in each month, the mass fraction organic HAP content, the density, and the volume fraction of solids. **(40 CFR 63.3130(c))**
 - d. For each material used in EU-Deadener and EU- Sealers&Adhes, the mass used in each month and the mass organic HAP content. **(40 CFR 63.3130(c))**
 - e. Calculations of the organic HAP emission rate for FG-MACT IIII-AUTO ASSEMBLY or FG-MACT IIII-AUTO ASSEMBLY WITH ECOAT in pounds per gallon of applied coating solids. If permittee chooses to comply with the option identified in Special Condition 1.5.a., a record of the weight fraction of each organic HAP in each material added to the Electrocoat system. These calculations and records must include all raw data, algorithms, and intermediate calculations. If the "Protocol for Determining Daily Volatile Organic Compound Emission Rate of Automobile and Light-Duty Truck Topcoat Operations," EPA-450/3-88-018 (Docket ID No. OAR-2002-0093 and Docket ID No. A-2001-22), is used, all data input to this protocol must be recorded. If these data are maintained as electronic files, the electronic files, as well as any paper copies must be maintained. **(40 CFR 63.3130(c), 40 CFR 63.3163, 40 CFR 63.3173)**
 - f. Calculation of the average monthly mass organic HAP content in pounds per pound of coating, separately for EU-Deadener and EU-Sealers&Adhes. **(40 CFR 63.3130(c), 40 CFR 63.3152)**
 - g. The name, volume, mass fraction organic HAP content and density of each cleaning material used. **(40 CFR 63.3130(d) - (f))**
 - e. ~~Monthly records of the following:~~~~

- ~~i. For each coating or thinner used in FG-MACT or FG-MACT WITH ECOAT, the volume used in each month, the mass fraction organic HAP content, the density, and the volume fraction of solids. (40 CFR 63.3130(e))~~
 - ~~ii. For each material used in EU-DEADENERS and EU-SEALERS & ADHESIVES, the mass used in each month and the mass organic HAP content. (40 CFR 63.3130(c))~~
 - ~~iii. Calculations of the organic HAP emission rate for FG-MACT or FG-MACT WITH ECOAT in pounds per gallon of applied coating solids. If permittee chooses to comply with the option identified in Special Condition I.5.a., a record of the weight fraction of each organic HAP in each material added to the Electrocoat system shall be kept. These calculations and records must include all raw data, algorithms, and intermediate calculations. If the "Protocol for Determining Daily Volatile Organic Compound Emission Rate of Automobile and Light-Duty Truck Topcoat Operations," EPA-450/3-88-018 (Docket ID No. OAR-2002-0093 and Docket ID No. A-2001-22), is used, all data input to this protocol must be recorded. If these data are maintained as electronic files, the electronic files, as well as any paper copies must be maintained. (40 CFR 63.3130(c), 40 CFR 63.3163, 40 CFR 63.3173)~~
 - ~~iv. Calculation of the average monthly mass organic HAP content in pounds per pound of coating, separately for EU-DEADENERS and EU-SEALERS & ADHESIVES. (40 CFR 63.3130(e), 40 CFR 63.3152)~~
 - ~~v. The name, volume, mass fraction organic HAP content and density of each cleaning material used. (40 CFR 63.3130(d)-(f))~~
 - ~~d. Any additional records pertaining to deviations; startup, shutdown or malfunctions; emission capture systems; performance testing; capture and control efficiency determinations; transfer efficiency determinations; work practice plans; and design and operation of control and monitoring systems for any emission capture system or add-on control device upon which compliance with any of the emission limits in Special Condition Nos. 1.1 through 1.4 depends, pursuant to 40 CFR 63.3130(g) through (o). (40 CFR 63.3130(g)-(o))~~
 - ~~e. Records pertaining to the design and operation of control and monitoring systems for any emission capture system or add-on control device upon which compliance with any of the emission limits in Special Condition Nos. 1.1 through 1.4 depends must be maintained on-site for the life of the equipment in a location readily available to plant operators and inspectors. (40 CFR 63.3130(o))~~
- ~~6. The permittee shall demonstrate continuous compliance with the operating limits specified in Table 1 of Subpart IIII of Part 63 for any emission capture system or add-on control device upon which compliance with any of the emission limits in Special Condition Nos. 1.1 through 1.4 depends pursuant to 40 CFR 63.3163 and 40 CFR 63.3173 using the method(s) described below: (40 CFR 63.3163, 40 CFR 63.3173 and Table 1)~~

Add-On Control Device:	Operating Limit:	Continuous Compliance Demonstration Method
Thermal Oxidizer	The average combustion temperature in any 3-hour period must not fall below the combustion temperature limit established according to 40 CFR 63.3167(a).	Collect the combustion temperature data according to 40 CFR 63.3168(c); Reduce the data to 3-hour block averages; and Maintain the 3-hour average combustion temperature at or above temperature limit.
Concentrators, Including Zeolite Wheels and Rotary Carbon Adsorbers	The average desorption gas inlet temperature in any 3-hour period must not fall below the limit established according to 40 CFR 63.3167(e).	Collect the temperature data according to 40 CFR 63.3168(f); Reduce the data to 3-hour block averages; and Maintain the 3-hour average temperature at or above the temperature limit.

- ~~7. Permittee shall monitor or secure the valve or closure mechanism controlling each bypass line for each capture system upon which compliance with any of the emission limits in Special Condition Nos. 1.1 through 1.4 depends in a non-bypass mode such that the valve or closure mechanism cannot be opened without creating a~~

4. The permittee shall submit all semiannual compliance reports as required by 40 CFR 63.3120(a). ~~The first time period covered by these reports shall be shortened so as to end on either June 30 or December 31, whichever comes first.~~ These reports shall be due March 15 for the reporting period July 1 to December 31 and September 15 for the reporting period January 1 to June 30.² **(40 CFR 63.3120(a))**
5. The Permittee shall submit applicable notifications specified in 40 CFR 63.7(b) and (c), 63.8(f)(4) and 63.9(b) through (e) and (h), as specified in 40 CFR 63.3110. **(40 CFR Part 63, Subparts A and IIII)**
- ~~6. For any emission capture system or add-on control device upon which compliance with any of the emission limits in Special Condition Nos. 1.1 through 1.4 depends, the permittee shall submit all performance test reports for emission capture systems and add-on control devices, and reports of transfer efficiency tests as required by 40 CFR 63.3120(b). **(40 CFR 63.3120(b))**~~
- ~~7. For any emission capture system or add-on control device upon which compliance with any of the emission limits in Special Condition Nos. 1.1 through 1.4 depends for which a startup, shutdown, or malfunction occurs during the semiannual reporting period, the permittee shall submit a SSM report as specified in 40 CFR 63.3120(c). **(40 CFR 63.3120(c), 40 CFR 63.10(d))**~~

See Appendix 8

VIII. STACK/VENT RESTRICTION(S)

The exhaust gases from the stacks listed in the table below shall be discharged unobstructed vertically upwards to the ambient air unless otherwise noted:

Stack & Vent ID	Maximum Exhaust Dimensions (inches)	Minimum Height Above Ground (feet)	Underlying Applicable Requirements
NA			

IX. OTHER REQUIREMENT(S)

1. The permittee shall comply with all applicable provisions of the National Emission Standards for Hazardous Air Pollutants, as specified in 40 CFR Part 63, Subpart A and Subpart IIII for Surface Coating of Automobiles and Light Duty Trucks by the initial compliance date as they apply to FG-MACT IIII-AUTO ASSEMBLY. The permittee may choose an alternative compliance method not listed in FG-MACT IIII-AUTO ASSEMBLY by providing the appropriate notifications required under 40 CFR part 63.9(j), maintaining a log required by 40 CFR Part 70.6(9), and by complying with all applicable provisions required by Subpart IIII for the compliance option chosen. (40 CFR 70.6(a)(9), 40 CFR Part 63.9(j), 40 CFR Part 63 Subparts A and IIII) **(40 CFR Part 63, Subparts A and IIII)**

Footnotes:

**FG-OLD
FLEXIBLE GROUP CONDITIONS**

DESCRIPTION

The affected source is each new, reconstructed, or existing Organic Liquid Distribution (OLD) (non-gasoline) operation that is located at, or is part of a major source of hazardous air pollutant (HAP) emissions. The affected source is comprised of storage tanks, transfer racks, equipment leak components associated with storage tanks, transfer racks and pipelines, transport vehicles, and all containers while loading or unloading at transfer racks subject to this subpart. Equipment that is part of an affected source under another NESHAP is excluded from the affected source. **(40 CFR 63.2338(c))**

These conditions specifically cover existing (construction pre-dates April 2, 2002) liquid storage tanks which hold more than 5,000 gallons but less than 50,000 gallons and/or new liquid storage tanks which hold more than 5,000 gallons but less than 10,000 gallons of methanol/windshield washer fill solvents that are dispensed to newly assembled vehicles.

III. PROCESS/OPERATIONAL RESTRICTION(S)

1. The permittee must comply with the requirements in Item 1 of Table 2c of 40 CFR Part 63, Subpart ZZZZ which apply to each engine in FG – MACT ZZZZ – CI ≤ 500 HP as specified in the following:

- a. Change oil and filter every 500 hours of operation or annually, whichever comes first, except as allowed in SC III.2;
- b. Inspect the air cleaner every 1,000 hours of operation or annually, whichever comes first, and replace as necessary; and
- c. Inspect all hoses and belts every 500 hours of operation or annually, whichever comes first, and replace as necessary.

If the emergency engine is being operated during an emergency and it is not possible to shut down the engine to perform the management practice requirements on the schedule required, or if performing the work practice on the required schedule would otherwise pose an unacceptable risk under federal, state, or local law, the management practice can be delayed until the emergency is over or the unacceptable risk under federal, state, or local law has abated. The management practice should be performed as soon as practicable after the emergency has ended or the unacceptable risk under Federal, State or local law has been abated. Sources must report any failure to perform the management practice on the schedule required and the Federal, State or local law or which the risk was deemed unacceptable. (40 CFR 63.6602, 40 CFR Part 63, Subpart ZZZZ, Table 2c.1)

1. The emergency CI engine/s shall be installed, maintained, and operated in a satisfactory manner. A list of recommended work practice standards as specified in 63.6602 and Table 2c, Item 1 or the permittee may

Formatted: Font: 10 pt

~~petition the Administrator pursuant to the requirements of 40 CFR 63.6(g) for alternative work practices. The following are the recommended work practices specified in 40 CFR Part 63 Subpart ZZZZ Table 2c:~~

- ~~a. Change oil and filter every 500 hours of operation or annually, whichever comes first, except as allowed in SC III.2.~~
- ~~b. Inspect the air cleaner every 1,000 hours of operation or annually, whichever comes first; and~~
- ~~c. Inspect all hoses and belts every 500 hours of operation or annually, whichever comes first, and replace as necessary.~~

~~If the emergency engine is being operated during an emergency and it is not possible to shut down the engine to perform the work practice standards on the schedule required the work practice standard can be delayed until the emergency is over. The work practice should be performed as soon as practicable after the emergency has ended or the unacceptable risk under Federal, State or local law has been abated. Sources must report any failure to perform the work practice on the schedule required and the Federal, State or local law or which the risk was deemed unacceptable. (40 CFR 63.6602, 40 CFR Part 63 Subpart ZZZZ Table 2c, Item 1)~~

2. The permittee may utilize an oil analysis program in order to extend the specified oil change requirement. The oil analysis must be performed at the same frequency as oil changes are required. The oil analysis must be performed at the same frequency specified for changing the oil in Table 2c to this subpart. **(40 CFR 63.6625(i))**
3. ~~The permittee shall install, maintain and operate the stationary RICE and after-treatment control device (if any) according to the manufacturer's emission-related written instructions or develop your own maintenance plan which must provide to the extent practicable for the maintenance and operation of the engine in a manner consistent with good air pollution control practice for minimizing emissions. (40 CFR 63.6625(e))~~
3. The permittee shall operate and maintain each engine in FG – MACT ZZZZ – CI ≤ 500 HP and after-treatment control device (if any) according to the manufacturer's emission-related written instructions or develop a maintenance plan which must provide to the extent practicable for the maintenance and operation of the engine in a manner consistent with good air pollution control practice for minimizing emissions. (40 CFR 63.6605, 40 CFR 63.6625(e), 40 CFR 63.6640(a), 40 CFR Part 63, Subpart ZZZZ, Table 6.9)
4. For each engine in FG – MACT ZZZZ – CI ≤ 500 HP, the permittee shall minimize the engine's time spent at idle during startup and minimize the engine's startup time to a period needed for appropriate and safe loading of the engine, not to exceed 30 minutes, after which time the emission standards applicable to all times other than startup apply. (40 CFR 63.6625(h))
5. The permittee may operate each engine in FG – MACT ZZZZ – CI ≤ 500 HP for no more than 100 hours per calendar year for the purpose of necessary maintenance checks and readiness testing, provided that the tests are recommended by Federal, State, or local government, the manufacturer, the vendor, the regional transmission organization or equivalent balancing authority and transmission operator, or the insurance company associated with the engine. The permittee may petition the Department for approval of additional hours to be used for maintenance checks and readiness testing. A petition is not required if the owner or operator maintains records indicating that Federal, State, or local standards require maintenance and testing of emergency internal combustion engines beyond 100 hours per calendar year. (40 CFR 63.6640(f)(2))
6. Each engine in FG – MACT ZZZZ – CI ≤ 500 HP may be operated for up to 50 hours per calendar year in non-emergency situations. The 50 hours of operation in non-emergency situations are counted as part of the 100 hours per calendar year for maintenance and testing provided in SC III.5. The 50 hours per calendar year for non-emergency situations cannot be used for peak shaving or non-emergency demand response, or to generate income for the permittee to supply power to an electric grid or otherwise supply power as part of a financial arrangement with another entity. (40 CFR 63.6640(f)(3))

IV. DESIGN/EQUIPMENT PARAMETERS

~~1. The permittee shall equip and maintain each engine in FG – MACT ZZZZ – CI ≤ 500 HP with non-resettable hours meters to track the operating hours. (40 CFR 63.6625(f))~~

~~0. The permittee shall install a non-resettable hour meter on each engine. (40 CFR 63.6625 (f))~~

V. TESTING/SAMPLING

Records shall be maintained on file for a period of five years. (R 336.1213(3)(b)(ii))

~~1. If using the oil analysis program, the permittee must at a minimum analyze the following three parameters: Total Base Number, viscosity, and percent water content. The condemning limits for these parameters are as follows: Total Base Number is less than 30% of the Total Base Number of the oil when new; viscosity of the oil has changed by more than 20% from the viscosity of the oil when new; or percent water content (by volume) is greater than 0.5. If all these condemning limits are not exceeded, the permittee is not required to change the oil. If any of the limits are exceeded, the permittee must change the oil within 2 business days of receiving the results of the analysis; if the engine is not in operation when the results of the analysis are received, the permittee must change the oil within 2 business days or before commencing operation, whichever is later. The permittee must keep records of the parameters that are analyzed as part of the program, the results of the analysis, and the oil changes for the engine. (40 CFR 63.6625(i))~~

~~0. If using the oil analysis program, the permittee must at a minimum analyze the following three parameters: Total Base Number, viscosity, and percent water content. The condemning limits for these parameters are as follows: Total Base Number is less than 30 percent of the Total Base Number of the oil when new; viscosity of the oil has changed by more than 20 percent from the viscosity of the oil when new; or percent water content (by volume) is greater than 0.5. If all of these condemning limits are not exceeded, the engine owner or operator is not required to change the oil. If any of the limits are exceeded, the engine owner or operator must change the oil within 2 business days of receiving the results of the analysis; if the engine is not in operation when the results of the analysis are received, the engine owner or operator must change the oil within 2 business days or before commencing operation, whichever is later. The owner or operator must keep records of the parameters that are analyzed as part of the program, the results of the analysis, and the oil changes for the engine. The analysis program must be part of the maintenance plan for the engine. (40 CFR 63.6625(i))~~

VI. MONITORING/RECORDKEEPING

Records shall be maintained on file for a period of five years. (R 336.1213(3)(b)(ii))

~~1. For each engine in FG – MACT ZZZZ – CI ≤ 500 HP, the permittee shall keep in a satisfactory manner the following:~~

~~a. A copy of each notification and report that was submitted to comply with 40 CFR Part 63, Subpart ZZZZ, including all documentation supporting any Initial Notification or Notification of Compliance Status that was submitted.~~

- ~~b. Records of the occurrence and duration of each malfunction of operation or the air pollution control and monitoring equipment.~~
- ~~c. Records of performance tests and performance evaluations.~~
- ~~d. Records of all required maintenance performed on the air pollution control and monitoring equipment.~~
- ~~e. Records of actions taken during periods of malfunction to minimize emissions, including corrective actions to restore malfunctioning process and air pollution control and monitoring equipment to its normal or usual manner of operation.~~

~~The permittee shall keep all records on file and make them available to the department upon request. (40 CFR 63.6655(a), 40 CFR 63.6660)~~

- ~~2. For each engine in FG – MACT ZZZZ – CI ≤ 500 HP, the permittee shall keep in a satisfactory manner, records to demonstrate continuous compliance with the operation and maintenance of the engine according to the manufacturer's emission-related operation and maintenance instructions; or develop and follow a maintenance plan that provides to the extent practicable for the maintenance and operation of the engine in a manner consistent with good air pollution control practice for minimizing emissions. The permittee shall keep all records on file and make them available to the department upon request. (40 CFR 63.6655(d), 40 CFR 63.6660, 40 CFR Part 63, Subpart ZZZZ, Table 6.9)~~
- ~~3. For each engine in FG – MACT ZZZZ – CI ≤ 500 HP, the permittee shall keep in a satisfactory manner, records of the maintenance conducted to demonstrate that the engine and after-treatment control device (if any) were operated and maintained according to the developed maintenance plan. The permittee shall keep all records on file and make them available to the department upon request. (40 CFR 63.6655(e), 40 CFR 63.6660)~~
- ~~4. The permittee shall monitor and record, the total hours of operation for each engine in FG – MACT ZZZZ – CI ≤ 500 HP on a monthly basis, and the hours of operation during emergency and non-emergency service that are recorded through the non-resettable hour meter for each engine in FG – MACT ZZZZ – CI ≤ 500 HP on a calendar year basis, in a manner acceptable to the AQD District Supervisor. The permittee shall document how many hours are spent for emergency operation including what classified the operation as emergency and how many hours are spent for non-emergency operation. The permittee shall keep all records on file and make them available to the department upon request. (R 336.1213(3) 40 CFR 63.6655(f), 40 CFR 63.6660)~~
- ~~5. If applicable, the permittee shall keep, in a satisfactory manner, fuel supplier certification records or fuel sample test data, for each delivery of diesel fuel oil used in FG – MACT ZZZZ – CI ≤ 500 HP, demonstrating that the fuel meets the requirement of SC II.1. The certification or test data shall include the name of the oil supplier or laboratory, the sulfur content, and cetane index or aromatic content of the fuel oil. The permittee shall keep all records on file and make them available to the department upon request. (R 336.1213(3), 40 CFR 1090.305)~~
- ~~6. The permittee's records must be in a form suitable and readily available for expeditious review according to 40 CFR 63.10(b)(1). (40 CFR 63.6660(a))~~
- ~~7. As specified in 40 CFR 63.10(b)(1), the permittee must keep each record for 5-years following the date of each occurrence, measurement, maintenance, corrective action, report, or record. (40 CFR 63.6660(b))~~
- ~~1. For each CI engine/s the permittee shall keep in a satisfactory manner, records of the occurrence and duration of each malfunction of operation or the air pollution control monitoring equipment. The permittee shall keep all records on file and make them available to the department upon request. (40 CFR 63.6655(a)(2), 40 CFR 63.6660)~~
- ~~2. For each CI engine/s the permittee shall keep in a satisfactory manner, records of actions taken during periods of malfunction to minimize emissions, including corrective actions to restore malfunctioning process and air pollution control and monitoring equipment to its normal or usual manner of operation. The permittee shall~~

Formatted: Font: 10 pt

III. PROCESS/OPERATIONAL RESTRICTION(S)

1. The permittee may operate FG-NSPS JJJJ EMERGENCY > 100 HP BUT < 500 HP for no more than 100 hours per calendar year for the purpose of necessary maintenance checks and readiness testing, provided that the tests are recommended by Federal, State, or local government, the manufacturer, the vendor, or the insurance company associated with the engine. Permittee may petition the Department for approval of additional hours to be used for maintenance checks and readiness testing. A petition is not required if the owner or operator maintains records indicating that Federal, State, or local standards require maintenance and testing of emergency internal combustion engines beyond 100 hours per year. FG-NSPS JJJJ EMERGENCY > 100 HP BUT < 500 HP may operate each engine up to 50 hours per year in non-emergency situations, but those 50 hours are counted towards the 100 hours per year provided for maintenance and testing. The 50 hours per year for non-emergency situations cannot be used for peak shaving or to generate income for a facility to supply non-emergency power as part of a financial arrangement with another entity. **(40 CFR 60.4243(d))**
2. The permittee shall operate and maintain FG-NSPS JJJJ EMERGENCY > 100 HP BUT < 500 HP such that it meets the emission limits in SC I.1, I.2, and I.3 over the entire life of the engine. **(40 CFR 60.4234, 40 CFR 60.4243(b))**
3. If the permittee purchased a certified engine, according to procedures specified in 40 CFR Part 60 Subpart JJJJ, for the same model year, the permittee shall meet the following requirements for FG-NSPS JJJJ EMERGENCY > 100 HP BUT < 500 HP:
 - a. Operate and maintain the certified engine and control device according to the manufacturer's emission-related written instructions,
 - b. Keep a maintenance plan and the permittee may only change those engine settings that are permitted by the manufacturer. If you do not operate and maintain the certified engine and control device according to the manufacturer's emission-related written instructions, the engine will be considered a non-certified engine. **(40 CFR 60.4243(b)(1))**

IV. DESIGN/EQUIPMENT PARAMETERS

1. EU-SI Emergency Generator LOC and EU-SI-Emergency Generator Stamping shall each be equipped with a non-resettable hour meter. **(R 336.1213(3)), (40 CFR 60.4237 (b))**
2. It is expected that air-to-fuel ratio controllers will be used with the operation of three-way catalysts/non-selective catalytic reduction. The AFR controller must be maintained and operated appropriately in order to ensure proper operation of the engine and control device to minimize emissions at all times. **(40 CFR 60.4243(g))**

V. TESTING/SAMPLING

1. The permittee shall conduct an initial performance test for FG-NSPS JJJJ EMERGENCY > 100 HP BUT < 500 HP within one year after startup of the engine to demonstrate compliance with the emission limits in 40 CFR 60.4233(e), unless the engines have been certified by the manufacturer as required by 40 CFR Part 60 Subpart JJJJ and the permittee maintains the engine as required by 40 CFR 60.4243(b)(1). If a performance test is required, the performance tests shall be conducted according to 40 CFR 60.4244. No less than 30 days prior to testing, a complete test plan shall be submitted to the AQD. The final plan must be approved by the AQD prior to testing. Verification of emission rates includes the submittal of a complete report of the test results to the AQD within 60 days following the last date of the test. **(40 CFR 60.4243, 40 CFR 60.4244, 40 CFR Part 60 Subpart JJJJ)**

VI. MONITORING/RECORDKEEPING

Records shall be maintained on file for a period of five years. **(R 336.1213(3)(b)(ii))**

1. The permittee shall keep records of the hours of operation for FG-NSPS JJJJ EMERGENCY > 100 HP BUT < 500 HP through a non-resettable hour meter. The permittee must document how many hours are spent for

20~~22~~17

ROP No: MI-ROP-~~A1641A1641-~~

Formatted: Font: 10 pt

Formatted: Font: 10 pt

emergency operation, including what classified the operation as emergency and how many hours are spent for non-emergency operation. **(40 CFR 60.4245(b))**

2. The permittee shall keep records of all notifications submitted to comply with this subpart and all documentation supporting any notification. **(40 CFR 60.4245(a)(1))**
3. The permittee shall keep records of maintenance conducted to demonstrate compliance. **(40 CFR 60.4243(a)(2), 60.4245(2))**
4. The permittee shall keep records of documentation from the manufacturer that the engine is certified to meet the emission standards and information as required in 40 CFR parts 90, 1048, 1054 and 1060, as applicable. **(40 CFR 60.4245(a)(3))**
5. If FG-NSPS JJJJ EMERGENCY > 100 HP BUT < 500 HP is not a certified engine or a certified engine is operating in a non-certified manner and subject to 60.4243(a)(2), documentation that the engine meets the emission standards. **(40 CFR 60.4245(a)(4))**

VII. REPORTING

1. Prompt reporting of deviations pursuant to General Conditions 21 and 22 of Part A. **(R 336.1213(3)(c)(ii))**
2. Semi-annual reporting of monitoring and deviations pursuant to General Condition 23 of Part A. The report shall be postmarked or received by the appropriate AQD District Office by March 15 for reporting period July 1 to December 31 and September 15 for reporting period January 1 to June 30. **(R 336.1213(3)(c)(i))**
3. Annual certification of compliance pursuant to General Conditions 19 and 20 of Part A. The report shall be postmarked or received by the appropriate AQD District Office by March 15 for the previous calendar year. **(R 336.1213(4)(c))**

See Appendix 8-1

VIII. STACK/VENT RESTRICTIONS

NA

IX. OTHER REQUIREMENT(S)

1. The permittee shall comply with all applicable provisions of the New Source Performance Standards, as specified in 40 CFR Part 60, Subpart A and Subpart JJJJ, as they apply to each affected emergency engine **(40 CFR Part 60, Subparts A and JJJJ)**

Footnotes:

¹This condition is state only enforceable and was established pursuant to Rule 201(1)(b).

²This condition is federally enforceable and was established pursuant to Rule 201(1)(a).

FG-RULE290 FLEXIBLE GROUP CONDITIONS

DESCRIPTION

Any emission unit that emits air contaminants and is exempt from the requirements of Rule 201 pursuant to Rules 278 and 290.

Emission Unit:

POLLUTION CONTROL EQUIPMENT

I. EMISSION LIMIT(S)

1. Each emission unit that emits only noncarcinogenic volatile organic compounds or noncarcinogenic materials which are listed in Rule 122(f) as not contributing appreciably to the formation of ozone if the total uncontrolled or controlled emissions of air contaminants are not more than 1,000 or 500 pounds per month, respectively. **(R 336.1290(a)(i))**
2. Each emission unit that the total uncontrolled or controlled emissions of air contaminants are not more than 1,000 or 500 pounds per month, respectively, and all the following criteria listed below are met: **(R 336.1290(a)(ii))**
 - a. For noncarcinogenic air contaminants, excluding noncarcinogenic volatile organic compounds and noncarcinogenic materials which are listed in Rule 122(f) as not contributing appreciably to the formation of ozone, with initial threshold screening levels greater than or equal to 2.0 micrograms per cubic meter, the uncontrolled or controlled emissions shall not exceed 1,000 or 500 pounds per month, respectively. **(R 336.1290(a)(ii)(A))**
 - b. For noncarcinogenic air contaminants, excluding noncarcinogenic volatile organic compounds and noncarcinogenic materials which are listed in Rule 122(f) as not contributing appreciably to the formation of ozone, with initial threshold screening levels greater than or equal to 0.04 microgram per cubic meter and less than 2.0 micrograms per cubic meter, the uncontrolled or controlled emissions shall not exceed 20 or 10 pounds per month, respectively. **(R 336.1290(a)(ii)(B))**
 - c. For carcinogenic air contaminants with initial risk screening levels greater than or equal to 0.04 microgram per cubic meter, the uncontrolled or controlled emissions shall not exceed 20 or 10 pounds per month, respectively. **(R 336.1290(a)(ii)(C))**
 - d. The emission unit shall not emit any air contaminants, excluding non-carcinogenic volatile organic compounds and noncarcinogenic materials which are listed in Rule 122(f) as not contributing appreciably to the formation of ozone, with an initial threshold screening level or initial risk screening level less than 0.04 microgram per cubic meter. **(R 336.1290(a)(ii)(D))**
3. Each emission unit that emits only noncarcinogenic particulate air contaminants and other air contaminants that are exempted under Rule 290(a)(i) and/or Rule 290(a)(ii), if all of the following provisions are met: **(R 336.1290(a)(iii))**
 - a. The particulate emissions are controlled by an appropriately designed and operated fabric filter collector or an equivalent control system which is designed to control particulate matter to a concentration of less than or equal to 0.01 pound of particulate per 1,000 pounds of exhaust gases and which does not have an exhaust gas flow rate more than 30,000 actual cubic feet per minute. **(R 336.1290(a)(iii)(A))**
 - b. The visible emissions from the emission unit are not more than 5 percent opacity in accordance with the methods contained in Rule 303. **(R 336.1290(a)(iii)(B))**
 - c. The initial threshold screening level for each particulate air contaminant, excluding nuisance particulate, is more than 2.0 micrograms per cubic meter. **(R 336.1290(a)(iii)(C))**

II. MATERIAL LIMIT(S)

NA

III. PROCESS/OPERATIONAL RESTRICTION(S)

1. The provisions of Rule 290 apply to each emission unit that is operating pursuant to Rule 290. **(R 336.1290)**

IV. DESIGN/EQUIPMENT PARAMETER(S)

NA

V. TESTING/SAMPLING

NA

VI. MONITORING/RECORDKEEPING

Records shall be maintained on file for a period of five years. **(R 336.1213(3)(b)(ii))**

1. The permittee shall maintain records of the following information for each emission unit for each calendar month using the methods outlined in the DEQ, AQD Rule 290, Permit to Install Exemption Record form (EQP 3558) or an alternative format that is approved by the AQD District Supervisor. **(R 336.1213(3))**
 - a. Records identifying each air contaminant that is emitted. **(R 336.1213(3))**
 - b. Records identifying if each air contaminant is controlled or uncontrolled. **(R 336.1213(3))**
 - c. Records identifying if each air contaminant is either carcinogenic or non-carcinogenic. **(R 336.1213(3))**
 - d. Records identifying the ITSL and IRSL, if established, of each air contaminant that is being emitted under the provisions of Rules 290(a)(ii) and (iii). **(R 336.1213(3))**
 - e. Material use and calculations identifying the quality, nature, and quantity of the air contaminant emissions in sufficient detail to demonstrate that the actual emissions of the emission unit meet the emission limits outlined in this table and Rule 290. **(R 336.1213(3), R 336.1290(c))**
2. The permittee shall maintain an inventory of each emission unit that is exempt pursuant to Rule 290. This inventory shall include the following information. **(R 336.1213(3))**
 - a. The permittee shall maintain a written description of each emission unit as it is maintained and operated throughout the life of the emission unit. **(R 336.1290(b), R 336.1213(3))**
 - b. For each emission unit that emits noncarcinogenic particulate air contaminants pursuant to Rule 290(a)(iii), the permittee shall maintain a written description of the control device, including the designed control efficiency and the designed exhaust gas flow rate. **(R 336.1213(3))**
3. For each emission unit that emits noncarcinogenic particulate air contaminants pursuant to Rule 290(a)(iii), the permittee shall perform a monthly visible emission observation of each stack or vent during routine operating conditions. This observation need not be performed using Method 9. The permittee shall keep a written record of the results of each observation. **(R 336.1213(3))**

See Appendix 4

**FG-COLDCLEANERS
FLEXIBLE GROUP CONDITIONS**

DESCRIPTION

Any cold cleaner that is grandfathered or exempt from Rule 201 pursuant to Rule 278 and Rule 281(h) or Rule 285(r)(iv). Existing cold cleaners were placed into operation prior to July 1, 1979. New cold cleaners were placed into operation on or after July 1, 1979.

Emission Unit:

I. EMISSION LIMIT(S)

NA

II. MATERIAL LIMIT(S)

1. The permittee shall not use cleaning solvents containing more than five percent by weight of the following halogenated compounds: methylene chloride, perchloroethylene, trichloroethylene, 1,1,1-trichloroethane, carbon tetrachloride, chloroform, or any combination thereof. **(R 336.1213(2))**

III. PROCESS/OPERATIONAL RESTRICTION(S)

1. Cleaned parts shall be drained for no less than 15 seconds or until dripping ceases. **(R 336.1611(2)(b), R 336.1707(3)(b))**
2. The permittee shall perform routine maintenance on each cold cleaner as recommended by the manufacturer. **(R 336.1213(3))**

IV. DESIGN/EQUIPMENT PARAMETER(S)

1. The cold cleaner must meet one of the following design requirements:
 - a. The air/vapor interface of the cold cleaner is no more than ten square feet. **(R 336.1281(h))**
 - b. The cold cleaner is used for cleaning metal parts and the emissions are released to the general in-plant environment. **(R 336.1285(r)(iv))**
2. The cold cleaner shall be equipped with a device for draining cleaned parts. **(R 336.1611(2)(b), R 336.1707(3)(b))**
3. All new and existing cold cleaners shall be equipped with a cover and the cover shall be closed whenever parts are not being handled in the cold cleaner. **(R 336.1611(2)(a), R 336.1707(3)(a))**
4. The cover of a new cold cleaner shall be mechanically assisted if the Reid vapor pressure of the solvent is more than 0.3 psia or if the solvent is agitated or heated. **(R 336.1707(3)(a))**
5. If the Reid vapor pressure of any solvent used in a new cold cleaner is greater than 0.6 psia; or, if any solvent used in a new cold cleaner is heated above 120 degrees Fahrenheit, then the cold cleaner must comply with at least one of the following provisions:
 - a. The cold cleaner must be designed such that the ratio of the freeboard height to the width of the cleaner is equal to or greater than 0.7. **(R 336.1707(2)(a))**
 - b. The solvent bath must be covered with water if the solvent is insoluble and has a specific gravity of more than 1.0. **(R 336.1707(2)(b))**
 - c. The cold cleaner must be controlled by a carbon adsorption system, condensation system, or other method of equivalent control approved by the AQD. **(R 336.1707(2)(c))**

V. TESTING/SAMPLING

NA

VI. MONITORING/RECORDKEEPING

Records shall be maintained on file for a period of five years. (R 336.1213(3)(b)(ii))

1. For each new cold cleaner in which the solvent is heated, the solvent temperature shall be monitored and recorded at least once each calendar week during routine operating conditions. In lieu of monitoring and recording the solvent temperature, the permittee may use a temperature control device to set the temperature below 120 degrees Fahrenheit. (R 336.1213(3))
2. The permittee shall maintain the following information on file for each cold cleaner: (R 336.1213(3))
 - a. A serial number, model number, or other unique identifier for each cold cleaner.
 - b. The date the unit was installed, manufactured or that it commenced operation.
 - c. The air/vapor interface area for any unit claimed to be exempt under Rule 281(h).
 - d. The applicable Rule 201 exemption.
 - e. The Reid vapor pressure of each solvent used.
 - f. If applicable, the option chosen to comply with Rule 707(2).
3. The permittee shall maintain written operating procedures for each cold cleaner. These written procedures shall be posted in an accessible, conspicuous location near each cold cleaner. (R 336.1611(3), R 336.1707(4))
4. As noted in Rule 611(2)(c) and Rule 707(3)(c), if applicable, an initial demonstration that the waste solvent is a safety hazard shall be made prior to storage in non-closed containers. If the waste solvent is a safety hazard and is stored in non-closed containers, verification that the waste solvent is disposed of so that not more than 20 percent, by weight, is allowed to evaporate into the atmosphere shall be made on a monthly basis. (R 336.1213(3), R 336.1611(2)(c), R 336.1707(3)(c))

VII. REPORTING

1. Prompt reporting of deviations pursuant to General Conditions 21 and 22 of Part A. (R 336.1213(3)(c)(ii))
2. Semi-annual reporting of monitoring and deviations pursuant to General Condition 23 of Part A. The report shall be postmarked or received by the appropriate AQD District Office by March 15 for reporting period July 1 to December 31 and September 15 for reporting period January 1 to June 30. (R 336.1213(3)(c)(i))
3. Annual certification of compliance pursuant to General Conditions 19 and 20 of Part A. The report shall be postmarked or received by the appropriate AQD District Office by March 15 for the previous calendar year. (R 336.1213(4)(c))

See Appendix 8

E. NON-APPLICABLE REQUIREMENTS

At the time of the ROP issuance, the AQD has determined that no non-applicable requirements have been identified for incorporation into the permit shield provision set forth in the General Conditions in Part A pursuant to Rule 213(6)(a)(ii).

APPENDICES

Appendix 1: Abbreviations and Acronyms

The following is an alphabetical listing of abbreviations/acronyms that may be used in this permit.

AQD	Air Quality Division	MSDS	Material Safety Data Sheet
acfm	Actual cubic feet per minute	MW	Megawatts
BACT	Best Available Control Technology	NA	Not Applicable
BTU	British Thermal Unit	NAAQS	National Ambient Air Quality Standards
°C	Degrees Celsius	NESHAP	National Emission Standard for Hazardous Air Pollutants
CAA	Federal Clean Air Act	NMOC	Non-methane Organic Compounds
CAM	Compliance Assurance Monitoring	NOx	Oxides of Nitrogen
CEM	Continuous Emission Monitoring	NSPS	New Source Performance Standards
CFR	Code of Federal Regulations	NSR	New Source Review
CO	Carbon Monoxide	PM	Particulate Matter
COM	Continuous Opacity Monitoring	PM-10	Particulate Matter less than 10 microns in diameter
department	Michigan Department of Environmental Quality	pph	Pound per hour
dscf	Dry standard cubic foot	ppm	Parts per million
dscm	Dry standard cubic meter	ppmv	Parts per million by volume
EPA	United States Environmental Protection Agency	ppmw	Parts per million by weight
EU	Emission Unit	PS	Performance Specification
°F	Degrees Fahrenheit	PSD	Prevention of Significant Deterioration
FG	Flexible Group	psia	Pounds per square inch absolute
GACS	Gallon of Applied Coating Solids	psig	Pounds per square inch gauge
gr	Grains	PeTE	Permanent Total Enclosure
HAP	Hazardous Air Pollutant	PTI	Permit to Install
Hg	Mercury	RACT	Reasonable Available Control Technology
hr	Hour	ROP	Renewable Operating Permit
HP	Horsepower	SC	Special Condition
H ₂ S	Hydrogen Sulfide	scf	Standard cubic feet
HVLP	High Volume Low Pressure *	sec	Seconds
ID	Identification (Number)	SCR	Selective Catalytic Reduction
IRSL	Initial Risk Screening Level	SO ₂	Sulfur Dioxide
ITSL	Initial Threshold Screening Level	SSM	Startup, shutdown, malfunction
LAER	Lowest Achievable Emission Rate	SRN	State Registration Number
lb	Pound	TAC	Toxic Air Contaminant
m	Meter	Temp	Temperature
MACT	Maximum Achievable Control Technology		Total Hydrocarbons
MAERS	Michigan Air Emissions Reporting System	tpy	Tons per year
MAP	Malfunction Abatement Plan	µg	Microgram
MDEQEGLE	Michigan Department of Environmental Quality, Environment, Great Lakes, and Energy	VE	Visible Emissions
mg	Milligram	VOC	Volatile Organic Compounds
mm	Millimeter	yr	Year

Appendix 2. Schedule of Compliance

The permittee certified in the ROP application that this stationary source is in compliance with all applicable requirements and the permittee shall continue to comply with all terms and conditions of this ROP. A Schedule of Compliance is not required. (R 336.1213(4)(a), R 336.1119(a)(ii))

Appendix 3. Monitoring Requirements

Specific monitoring requirement procedures, methods or specifications are detailed in Part A or the appropriate Source-Wide, Emission Unit and/or Flexible Group Special Conditions. Therefore, this appendix is not applicable.

Appendix 4. Recordkeeping

Specific recordkeeping requirement formats and procedures are detailed in Part A or the appropriate source-wide, emission unit and/or flexible group special conditions. Therefore, this appendix is not applicable.

Appendix 5. Testing Procedures

There are no specific testing requirement plans or procedures for this ROP. Therefore, this appendix is not applicable.

Appendix 6. Permits to Install

The following table lists any Permit to Install and/or Operate, that relate to the identified emission units or flexible groups as of the effective date of this ROP. This includes all Permits to Install and/or Operate that are hereby incorporated into Source-Wide PTI No. MI-PTI-A1641-2017. PTIs issued after the effective date of this ROP, including amendments or modifications, will be identified in Appendix 6 upon renewal.

Permit to Install Number	Description of Equipment	Corresponding Emission Unit(s) or Flexible Group(s)
134-99F	This permit covers automotive assembly and painting operations.	FG-Topcoat, FG-Solvents, FG-Repair, FG-Final Repair, FG-Storage Tanks, FG-MACT, FG-HAPs, FG-Facility
74-11	Permit language was modified to reflect change in abatement description.	EU-Guidecoat

202247

ROP No: MI-ROP-[A1641A1641](#)

Formatted: Font: 10 pt

Expiration Date: November 20, 2022

PTI No.: MI-PTI-[A1641A1641](#)-202247

Formatted: Font: 10 pt

The following ROP amendments or modifications were issued after the effective date of ROP No. MI-ROP-A1641-2012.

Permit to Install Number	ROP Revision Application Number/Issuance Date	Description of Change	Corresponding Emission Unit(s) or Flexible Group(s)
NA	201200163/ October 31, 2012	Zip code change from 48921 to 48933.	NA
NA	201300102/ August 20, 2013	Remove emission unit EU-StartUpRoll from the ROP due to USEPA determination letter dated 11/27/2012. Letter provided determination that the roll-test operations at General Motor's Orion Assembly Plant would not be subject to Title I of the Clean Air Act. In a subsequent meeting with members of the Automobile Manufacturer's Alliance on 01/24/2013, AQD agreed that the USEPA determination would be applicable to all OEM Assembly Plant roll-test operations.	EU-StartUpRoll

Appendix 7. Emission Calculations

The permittee shall use the following calculations in conjunction with monitoring, testing or recordkeeping data to determine compliance with the applicable requirements referenced in FG-112.

HAP Calculations

HAP emission rate (lb/GACS) for each calendar month (for use with Special Condition Nos. 1.1, 1.3)	=	$\frac{\sum_{i=1}^{zc} L_{ci} D_{ci} H_{ci} + \sum_{j=1}^y L_{sj} D_{sj} H_{sj}}{\sum_{i=1}^{zc} L_{ci} V_{ci} T} x(1 - DExN)$
Monthly mass HAP emission rate (tons/month) as determined at the end of each calendar month (for use with Special Condition Nos. 1.2, 1.4, 1.6, 1.7)	=	$\frac{\left(\sum_{i=1}^{zc} L_{ci} D_{ci} H_{ci} \right) - R}{2000} x(1 - DExN)$
Annual mass VOC emission rate (tons/12-month rolling time period) as determined at the end of each calendar month (for use with Special Condition Nos. 1.2, 1.4, 1.6, 1.7)	=	$\frac{\left(\sum_{b=1}^{12} \sum_{i=1}^{zc} L_{ci} D_{ci} H_{ci} \right) - R}{2000} x(1 - DExN)$
HAP emission rate (lb/gal, as applied) for each calendar month (for use with Special Condition No. 1.5)	=	$\frac{\sum_{i=1}^{zc} L_{ci} D_{ci} H_{ci}}{\sum_{i=1}^{zc} L_{ci}}$

Where:

- L_{ci} = Volume of each coating "i" used during the current calendar month, gallons.
- D_{ci} = Density of each coating "i" as received, pound/gallon.
- V_{ci} = Proportion of solids by formula volume in each coating "i" as received, gallon solids/gallon
- H_{ci} = Proportion of HAP by weight in each coating "i" as received, lb HAP/lb.
NOTE: D_{ci} and H_{ci} may be reported separately, but will normally be reported as a single value $D_{ci} H_{ci}$ (pound HAP/gallon).
- L_{sj} = Volume of each VOC dilution solvent "j" added to the coating, gallons.
- D_{sj} = Density of each VOC dilution solvent "j" added to the coating, pound/gallon.
- H_{sj} = Proportion of HAP by weight in dilution solvent "j" as received, lb HAP/lb.
- j = An individual dilution solvent used during the calendar month.
- i = An individual coating used during the calendar month.
- zc = The total number of different coatings "i" used during the calendar month.
- y = The total number of different dilution solvents "j".
- T = Overall transfer efficiency for all coatings "i", as a fraction (per 40 CFR 393(C)).
- b = Current calendar month plus 11 preceding calendar months.
- DE = VOC destruction efficiency of add-on emission control device(s), if present.
- N = Fraction, by weight, of total VOC emitted by EU-Guidecoat which is captured and enters the add-on emission control device(s), if present, as a fraction.
- R = Amount of solvent reclaimed during the calendar month (this term shall be zero when used with any Special Condition other than Special Condition 1.7)

Appendix 8. Reporting

A. Annual, Semi-annual, and Deviation Certification Reporting

The permittee shall use the ~~MDEQEGLE~~ Report Certification form (EQP 5736) and ~~MDEQEGLE~~ Deviation Report form (EQP 5737) for the annual, semiannual and deviation certification reporting referenced in the Reporting Section of the Source-Wide, Emission Unit and/or Flexible Group Special Conditions. Alternative formats must meet the provisions of Rule 213(4)(c) and Rule 213(3)(c)(i), respectively, and be approved by the AQD District Supervisor.

B. Other Reporting

Specific reporting requirement formats and procedures are detailed in Part A or the appropriate Source-Wide, Emission Unit and/or Flexible Group Special Conditions. Therefore, Part B of this appendix is not applicable.
