05/09/2014	ROP Annual Cert	Compliance	The facility submitted a revised certification after staff noted that they reported no deviations but the 2nd semi-annual report had 3 of them. Staff allowed them to revise it since it's never happened before and staff will not send a violation in this instance. Anyway, the facility reported deviations for not monitoring several parameters (opacity, pressure drop, etc.) on a 3 pieces of equipment. These happened in periods ranging from one to two weeks. The facility stated that they have made corrections to insure that it doesn't occur again. This has not been an issue at the facility in the past so staff won't send them a violation notice at the present time unless it becomes reoccurring in nature.
