Re: Violation: Special Condition #17  
of Wayne Co. Installation Permit C-9742  
Rule 910

To whom it may concern,

On March 12, 2015, we, Michigan Tile & Marble, were given a 10-day grace period with the above violation of which our Dry Filter Mats were not installed in our Marble cutting/sanding equipment. On March 27, the inspector came by and our filters were not installed yet which constituted a violation of Act 451, Rule 910.

On the first of every month, Michigan Tile and Marble intends to change out these filters so they may be able to pass future inspections. We have manufactured a new hood to hold the filters. We are a very small shop with very few employees and seriously was not able to make the 10-day period. We do apologize for this error on our part. We are working to keep our shops safe and in compliance with the rules and regulations.

The Inspector, Mr. U. Sam Amer, is more than welcome to come back for follow-up of this violation.

Sincerely,

Frank Iaquina  
Manager
