Re: 9/20/16 Notice of Violation – Global Titanium Inc., 19300 Filer, Detroit, MI 48234

Dear Mr. Krawiec:

This correspondence is the status report due April 5 regarding Global Titanium Inc.'s ("GTI's") investigation into the issues raised by the Notice of Violation referenced above.

GTI has discussed the "odor" issues with various vendors and consultants. We have determined there are improvements that can be made to our wet scrubber equipment which will remove additional and finer particles from the emission. Based on the vendor analysis and recommendation, we have purchased a larger fan which will allow removal of sub-micron particles which should remove the oil particles (mist). The purchase order was placed on March 9 and delivery was quoted for 8 weeks. Following delivery, the installation will likely take two to three weeks. Therefore, we should have feedback for you by mid-June. Based on the information supplied by the vendor we are confident we have found an acceptable solution.

This installation is scheduled for Wash Building 2. We have started talking to the vendor relating to Wash Building 1. However, we plan to wait for the results of the installation for Wash Building 2 before we make further investment into Wash Building 1.

GTI continues to monitor the operations daily to make sure there are not any odors from the operations. We are not aware of any complaints from the neighborhood.

However, we think you should be aware that an intense "skunk" odor has enveloped the neighborhood at times (most recently March 20) which appears to be coming from an indoor agricultural operation at or around 19303 Mt. Elliott. This odor is not related in any way to GTI's operations.
