SUBJECT: concrete batch plant		
RESOLVED COMPLAINTS:		

On 8/7/2015 I conducted an unannounced inspection of this facility. I met with Mr. Mark Mottes.

Mr. Mottes explained that facility was sold and the batch plant under PTI #282-76A was removed from the site. This happened about 6 years ago. Schinella-Mottes Construction Company no longer exists. The site in Iron River is used primarily for aggregate production for asphalt jobs in the area. Aggregate is crushed in preparation for the asphalt jobs and a portable asphalt plant is moved into the pit.

A note will be sent to the Permit's Section requesting to void PTI #282-76A.

This facility can be removed from the UP Inspection database.
