RE: SRN: B5578, Kent County  
Light Metals Corporation (LMC)

Dear Ms. Lazzaro:

We have had an opportunity to have FTC&H complete the Potential to Emit (PTE), Rule 290 Exemptions, Rule 278 Exclusions from Exemption for the facility and the Greenhouse Gas (GHG) emissions report prior to the April 1, 2015 submission date noted in our January 21, 2015 response letter. Considering the size of the response document, we have had our Facilities Consultant, Kevin J. Kane, AIA email you a digital copy direct and it is our understanding you have acknowledged the receipt of this digital file. We appreciate not having to print a hard copy of the 460 page report for submission to your office.

We have reviewed this report in detail with FTC&H and do not believe there was any violation for "Failure to obtain Permit to Install" as noted in the Violation Notice dated January 8, 2015. We believe after your review of this report that you will agree and please provide whatever reporting documentation and public notice that is required to show this Violation Notice has been withdrawn.

Please let us know of any additional information or documentation required is required to resolve this issue.

Sincerely,

Rhonda L. Zolman
