

DEPARTMENT OF ENVIRONMENTAL QUALITY
 AIR QUALITY DIVISION
 ACTIVITY REPORT: Self Initiated Inspection

B682830120

FACILITY: U.S. Venture, Inc.		SRN / ID: B6828
LOCATION: 311 COAST GUARD DR, CHEBOYGAN		DISTRICT: Gaylord
CITY: CHEBOYGAN		COUNTY: CHEBOYGAN
CONTACT: Todd LaRocque , Regional Terminal Manager		ACTIVITY DATE: 07/08/2015
STAFF: Gloria Torello	COMPLIANCE STATUS: Compliance	SOURCE CLASS: SM OPT OUT
SUBJECT: Site visit.		
RESOLVED COMPLAINTS:		

While in Cheboygan County, Gloria Torello of AQD staff visited this facility. Two trucks were being filled in the load rack, and a third truck arrived while Torello was on site. No odors or visible emissions were noted. The site was very tidy.

Todd LaRocque of US Venture met with Torello. Todd was working on computer issues. Recently, this Cheboygan facility took over computer operation of the company's diesel tank located in the Calcite Quarry located in Rogers City, Presque Isle County.

Todd said this spring and summer has been extra busy because the company's Muskegon, Michigan terminal is down for two months for repairs and pipeline testing. As a result, more truck traffic is loading at this Cheboygan facility. Torello asked Todd if he is keeping track of his over all permit limited throughput. Todd said he indeed is.

Torello discussed with Todd suggesting the facility be considered for a visit by DEQ director Dan Wyant the next time Dan is looking for facilities to visit. Todd did not object to this suggestion. On 7/8/15 Torello sent DEQ's Phil Roycraft an email with the suggestion.
