VIOLATION NOTICE

Dear Mr. Huizenga:

On August 20, 2014, the Department of Environmental Quality (DEQ), Air Quality Division, received a written emissions report as well as additional documentation for the Davidson Plyforms facility located at 5500 33rd Street in Grand Rapids, Michigan. The report and information were used to verify Davidson Plyforms' compliance with the requirements of the federal Clean Air Act; Part 55, Air Pollution Control, of the Natural Resources and Environmental Protection Act, 1994 PA 451, as amended (Act 451); the administrative rules; and Air Use Permit to Install (PTI) No. 28-09A.

Based on the review of the company's information, staff verified the following:

	Rule/Permit	
Process Description	Condition Violated	Comments
FGCOATING	PTI No. 28-09A Special Condition I.4 (R 336.1225(1))	Formaldehyde emissions exceeded the 0.9 pounds per 10-hour permit limit on 10 occasions from May 2014 through July 2014. Emissions did not exceed 1.08 pounds per 10-hours.

It is recognized that the letter dated August 20, 2014 identified the reason for the formaldehyde exceedance, identified actions taken to minimize emissions, including conducting more thorough quality control of records, raising stack heights and remodeling the impacts of formaldehyde emissions. In addition, Davidson Plyforms has indicated that a revision to PTI No. 28-09A will be sought. Since the August 20, 2014 correspondence provided an acceptable compliance plan to prevent a reoccurrence, an additional compliance plan will not be necessary at this time.
