Dear Mr. Mueller:

VIOLATION NOTICE

On August 4, 2016, the Department of Environmental Quality (DEQ), Air Quality Division (AQD), conducted an inspection of Haviland Enterprises located at 421 Ann Street, 521 Ann Street, and 2168 Avastar Parkway, Grand Rapids and Walker, Michigan. The purpose of this inspection was to determine Haviland Enterprises' compliance with the requirements of the federal Clean Air Act; Part 55, Air Pollution Control, of the Natural Resources and Environmental Protection Act, 1994 PA 451, as amended (Act 451); and the Air Pollution Control Rules.

During the inspection, staff observed the following:

Process Description	Rule/Permit Condition Violated	Comments
Facility Operations	Rule 210	Failure to obtain a Renewable Operating Permit

After the inspection, AQD Staff requested a facility-wide Potential to Emit (PTE) demonstration to be completed and submitted to the AQD in order to determine Haviland Enterprises' compliance with Rule 210, which was received on November 29, 2016. The calculations provided demonstrate that the facility has potential emissions of Volatile Organic Compounds of 477 tons per year, which exceeds the Major Source threshold of 100 tons per year. Additionally, the facility has aggregate emissions of Hazardous Air Pollutants (HAP) of 428 tons, exceeding the Major Source threshold of 25 tons per year; several individual HAPs also exceed the Major Source threshold of 10 tons per year. Rule 210(1) requires that a major source obtain a Renewable Operating Permit.
