JULY 8, 2016

Daniel McGeen

MDEQ

525 West Allegan Street

PO Box 30242

Lansing Michigan 48909-7742

Dear Mr. McGeen,

This letter is in response to the violation notice dated June 29th 2016 for Key Plastics LLC. Howell Michigan. Let me start by saying this violation was in no way intentional, and upon receiving this notice Key Plastics corrected the violation the same day. I hope Key plastics commitment to doing the right has been evident to you during your inspections here and by the invitation for inspection that we extended to you prior to us starting this oven up for the first time. This oven was first commissioned on or around July 14th 2015 and has been in operation since. The cause of this violation was a misunderstanding of what was considered an obstruction. Key Plastics did not consider the cap an obstruction due to the size of the opening between the duct and cap. While it was not impeding air flow from the stack upon your explanation we understand the concern and reason for this notice. Please see attached pictures showing the stack both before and after the rain cap was removed. Key Plastics currently has no plans to install any new equipment in our facility, but should those plans change we again will extend the invitation to MDEQ to inspect prior to commissioning. If MDEQ is not available Key Plastics will utilize a 3rd party consultant to inspect prior to commissioning. Should you have any further questions or concerns please do not hesitate to contact me.

Warm regards,

Tim Lane
