ACTIVITY REPORT: Scheduled Inspection

N292344332

FACILITY: North Central Steel & Fabrication		SRN / ID: N2923
LOCATION: 8476 Yuill Road, VANDERBILT		DISTRICT: Gaylord
CITY: VANDERBILT		COUNTY: OTSEGO
CONTACT:		ACTIVITY DATE: 05/11/2018
STAFF: Sharon LeBlanc	COMPLIANCE STATUS: Unknown	SOURCE CLASS: MINOR
SUBJECT: Site scheduled for inspection during fiscal year 2018. Building is unoccupied, area resident indicated that the business has been gone for apx. 15 years. sgl		
RESOLVED COMPLAINTS:		

On May 8th and 11th, 2018, AQD District Staff conducted site investigations for the following facilities:

- Van Products, 8250 Mill Street, Vanderbilt, MI (N2611)
- North Central Steel & Fabrication, 8476 Yuill Road, Vanderbilt, MI (N2923)

The later facility was targeted for site inspection during the 2018 fiscal year.

Prior to mobilizing, AQD Staff conducted both a Google Search as well as a property search thru the Otsego County GIS system in an attempt to confirm the business status and locations. Neither of the two businesses were able to be confirmed by name or address. Based on property search information, it appears that a renumbering has occurred since the sites were permitted.

Discussions with local, long term area residents employed at H&H Tubing, confirmed that North Central Steel & Fabrication was located across Yuill Street from the present MEC Facility, located at 8276 Yuill Street. The North Central Steel & Fabrication business is reported to have been gone for approximately 15 years. The building is presently vacant and does not appear to have been occupied for a number of years, consistent with the resident.

The property search identified the facility as parcel 000-055-02 located at 8295 Yuill, owned by Douglas O'Rourke. A Vanderbilt PO Box is listed as the owner address. The search also identified other vacant adjacent parcels as being owned by the same person(s).

The status for this site has been changed to temporarily closed, as the location and permitted spray booth (PTI 497-91) may at some future date may begin operations.
