AIR QUALITY DIVISION
ACTIVITY REPORT: Scheduled Inspection

N338540349

FACILITY: Saginaw Bay Plastics Inc.		SRN / ID: N3385
LOCATION: 2768 S Huron Road, KAWKAWLIN		DISTRICT: Saginaw Bay
CITY: KAWKAWLIN		COUNTY: BAY
CONTACT: David Burke , President		ACTIVITY DATE: 06/20/2017
STAFF: Gina McCann	COMPLIANCE STATUS: Compliance	SOURCE CLASS:
SUBJECT: Compliance Inspection report of PTI 259-92		
RESOLVED COMPLAINTS:		

I (glm) performed an unannounced, scheduled inspection of Saginaw Bay Plastics, Inc. I met with Mr. David Burke, President who provided a tour and overview of the facility's production areas. At the time of the inspection the facility appeared to be in compliance with applicable state and federal air quality regulations.

Saginaw Bay Plastics, Inc. is a global provider of injection molded plastic parts since 1978. They utilize (3) shifts and employee approximately 85 people. The process consists of several individual stations used to produce plastic injection molded parts for the automotive industry. The ventilation provided is for operator comfort and the exhausted heat is reclaimed in heating the plastic pellets to molding temperature. No associated odors were observed inside or outside the facility. The particulate matter that is exhausted is minute or nonexistent. The facility has one active PTI with AQD, #259-92 for mold release usage.

When the facility was permitted in 1992 the maximum VOC emissions were calculated to be 66 lbs/year. Under current AQD regulations PTI #259-92 would not be required. This is a true minor facility. At the time of the inspection the facility had (16), 12 ounce, spray cans on hand and used less than (1) can a week.

The facility was in compliance with known, applicable, state and federal, air quality regulations at the time of the inspection.
