Dear Mr. Cell:

VIOLATION NOTICE

On January 24, 2020, the Department of Environment, Great Lakes, and Energy (EGLE), Air Quality Division (AQD), conducted an inspection of Reliance Finishing Company located at 1236 Judd Street SW, Grand Rapids, Michigan. The purpose of this inspection was to determine Reliance Finishing Company's compliance with the requirements of the federal Clean Air Act; Part 55, Air Pollution Control, of the Natural Resources and Environmental Protection Act, 1994 PA 451, as amended (Act 451); the Air Pollution Control Rules; and the conditions of Permit to Install (PTI) numbers 306-96B and 222-08.

During the inspection, staff observed the following:

Process Description	Rule/Permit Condition Violated	Comments
Sludge Drying Oven	Rule 201	Operating without an air permit

PTI No. 306-96B was issued for an oven to remove cured coatings from metal parts. The oven is now used to dry sludge from the wastewater treatment system on site. Since the oven is no longer used for its original intent as permitted and there has been a change in the method of operation, this is a violation of Rule 201 of the administrative rules promulgated under Act 451.

A program for compliance may include a completed PTI application for the sludge drying oven process equipment. An application form is available by request, or at the following website: www.michigan.gov/air (in the shaded box on the upper right-hand side of the page).

Be advised that Rule 201 requires that a permit be obtained prior to installation, construction, operation, reconstruction, relocation, or alteration of any process or process equipment which may be a source of an air contaminant.
