SUBJECT: Follow up on PTI #1082-92		
RESOLVED COMPLAINTS:		

On 2/22/1992, PTI #1082-92 was issued to Dale's Union 76 Service for a waste oil furnace.

On 11/3/16 I conducted an unannounced inspection of this facility. My contact was the owner, Mr. David Blake. Mr. Blake has been the owner of this facility since 1997. His father, Mr. Dale Blake owned the facility prior.

The waste oil furnace permitted under PTI #1082-92 has long been removed.

A new waste oil furnace was installed 6 or 7 years ago. The unit is a Clean Burn CB1750, rated at 175,000 Btu/hr. Mr. Blake stated he only burns waste oil generated on site from mechanical work in his shop.

This furnace is exempt from the need for an air use permit under Rule 282 (B)(iv) as only waste oil generated onsite is burned and the unit is rated at less than 500,000 Btu/hour.

I informed Mr. Blake that a request to void PTI #1082-92 would be submitted.

A note will be sent to Ms. Sue Thelen in the Permit Section requesting to void this permit.

The facility appears to be operating in compliance with the Air Pollution Control Rules.
