Dear Mr. Oliver:

VIOLATION NOTICE

On October, 5 2018, the Department of Environmental Quality (DEQ), Air Quality Division (AQD), conducted an inspection of Industrial Metal Coatings (IMC) located at 6070 Eighteen Mile Road, Sterling Heights, Michigan. The purpose of this inspection was to determine IMC's compliance with the requirements of the federal Clean Air Act; Part 55, Air Pollution Control, of the Natural Resources and Environmental Protection Act, 1994 PA 451, as amended (Act 451); the Air Pollution Control Rules; and to investigate several complaints which we received regarding foul odors attributed to the facility's operations.

During the inspection, staff observed the following:

Process Description	Rule/Permit Condition Violated	Comments
E-coat line with drying oven	AQD Air Pollution Control Rule 901	Strong odor was verified downwind of IMC. AQD staff confirmed the odor was due to the E-Coat line. The burn-off ovens were not operating at the time of inspection, and operation records show the ovens had not been operated that day.

In the professional judgment of AQD staff, the odors that were observed were of sufficient intensity, frequency and duration so as to constitute a violation of Rule 901 of the administrative rules promulgated under Act 451

Please initiate actions necessary to correct the cited violation and submit a written response to this Violation Notice by November 21, 2018 (which coincides with 21 calendar days from the date of this letter). The written response should include: the dates the violation occurred; an explanation of the causes and duration of the violation;
