This letter is in response to a violation notice SRN N5521, Osceola County

The records for the waste water evaporator calculations were discontinued in 2009 due to a change in personnel. The usage hours of the evaporator were maintained until 2014. In 2014, we made a major change in our usage of VOC's and felt we met the exemption requirements. We reviewed the past records and found we had not been performing any calculations since 2009 and wrongly concluded we had already been allowed to stop performing record keeping.

We have reinstated the record keeping logs and emission calculations are being filed starting 4-23-18. We have added the evaporator hours to the log sheet. We feel we are back in compliance with our new record keeping system.

Sincerely,

Tim Chipman
