**Re: Response to Notice of Noncompliance  
ANR Pipeline Company – Hamilton Compressor Station (SRN N5574)  
PTI 98-20**

Dear Mr. Yazzie,

A Letter of Noncompliance was received by ANR Pipeline Company (ANR) - Hamilton Compressor Station, dated August 31, 2023, from the Michigan Department of Environment Great Lakes and Energy (EGLE). The letter of noncompliance alleges that the Hamilton Compressor Station may not be in compliance with PTI 98-20 issued February 4, 2021.

EGLE identified the following area of noncompliance during an announced routine Full Compliance Evaluation conducted on June 27, 2023.

1. Stack Parameter Requirements in EUHM017, SC VIII.1 under PTI 98-20. The facility failed to comply with stack parameter requirements for the APU stack. The exhaust was not oriented vertically as stated in the permit.

An investigation into the findings identified that changes to the project specifications and process equipment were not captured by the appropriate stakeholders during the construction and commissioning period.

ANR strives to meet all permitting and compliance obligations. To that end, ANR has outlined the following action to rectify the findings and prevent recurrence:

1. ANR has already begun the process of remodeling the site emission as well as preparing a PTI modification to reflect the correct stack orientation as constructed.
2. ANR has begun the process of modifying our internal processes and work practices to ensure that changes in process equipment and or specifications that differ from the construction application as approved by EGLE are communicated to all appropriate stakeholders.

If you have any questions, please feel free to contact Christopher McFarlane at (832) 320-5490 or at [chris\\_mcfarlane@tcenergy.com](mailto:chris_mcfarlane@tcenergy.com).

Sincerely,

Jacob Schultz
