SUBJECT: site inspection verifying exempt status -		
RESOLVED COMPLAINTS:		

On 14 December AQD Inspector David Bowman conducted an onsite inspection of Riverside Chester 22 located off Lovells road, approx. 1.6 miles south of F38 (Old State Rd). There was no discernable odors and no VE coming from any stacks on the site. The facility was in full operation. The site is well kept.

Operating in the main building was a CAT3512LE unit # 910 operating. Daily maintenance records are being filled out and kept on site. The hour meter on the unit displayed 856946.8 hrs and operating at 250°F. This is in line with the last inspection from AQD Bill Rogers when he verified the revocation of the PTI making the site exempt.

In the back of the site there are two sets of tanks. See pic below. No odors, leaks, emissions visible around them.
