SUBJECT: pet crematory		
RESOLVED COMPLAINTS:		

On 2/11/2014 I conducted an unannounced inspection of this facility. My contact was Mr. Ron Waumbach. The facility continues to own and operate their pet crematory.

At the time of this inspection the crematory was down for repairs. The refractory in the primary combustion chamber has deteriorated and needs to be replaced. The unit has been operated without the refractory and some damage to the wiring has occurred from overheating. Materials for repair have been ordered.

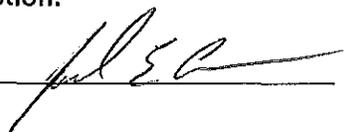

The unit is equipped with a strip chart recorder that records the temperature in the primary combustion chamber as required in Special Condition 1.5 of the facility's PTI # 361-01. The unit appears operational. Past charts are kept onhand for review as required in Special Condition 1.7. Mr. Waumbach stated the facility is interested in the possibility of replacing the strip chart recorder and installing a data logger.

Records of the description and weight of waste are also kept on hand as required in Special Condition 1.6.

Ashes not collected by pet owners are agriculturally applied.

No violations of the Air Pollution Control Rules or the facility's PTI # 361-01 were observed during this inspection.
