the Company's Permit to Install (PTI) Nos.110-18, 110-18A and 221-00C; and Renewable Operating Permit (ROP), Nos. MI-ROP-N0895-2012, MI-ROP-N0895-2018a, MI-ROP-N2079-2017, MI-ROP-N7374-2015, MI-ROP-N7374-2015a, and MI-ROP-N7374-2020.

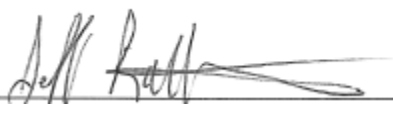

Please note the alleged violations in the VNs dated September 14, 2020, April 28, 2021, and June 24, 2021, are federally enforceable and are considered a High Priority Violation (HPV) by the United States Environmental Protection Agency (EPA). The HPV designation means that the EPA places a priority on enforcing the regulations governing this violation and on formally resolving alleged violations of this type. The AQD is required to report all HPVs to the EPA, pursuant to the state's grant commitments with the EPA and the state's delegated enforcement authority of the federal Clean Air Act.

The AQD is providing the Company with an opportunity to formally resolve these violations through the entry of a legally enforceable agreement that will include a compliance program and payment of an appropriate monetary penalty pursuant to Section 5528 of Part 55 of NREPA, MCL 324.5528.

Be advised that failure to respond to this Enforcement Notice in a timely manner and adequately resolve or address the cited violations may result in further enforcement proceedings, including but not limited to, referral of the matter to the Michigan Department of Attorney General (MDAG) for commencement of civil litigation. This Enforcement Notice does not preclude or limit EGLE's ability to initiate any other enforcement action under federal or state law as appropriate.

Please contact me at 517-275-2620, or by email at RathbunJ1@Michigan.gov, no later than January 18, 2022, to schedule a meeting to discuss the resolution of this matter.
