March 17, 2022

To Whom It May Concern,

The letter is in response to a violation notice dated February 25, 2022, (SRN: N7745, Macomb County). On February 4th, Adam Bognar from the Air Quality Division met with me for an inspection of our three cremation retorts. At this meeting, he informed me that we were in violation of the recent permit to install number 3-22.

We have initiated the corrections noted on the violation with Matthews Environmental Solutions. At this time they have not provided me with a date that the work can be completed. Since February 4th, 2022, we have not used EUCREMATORY2. We will continue to keep this furnace out of operation until the temperature can be re-calibrated and we have solved the issue with the furnace not reaching 1600 degrees Fahrenheit before starting waste combustion. As of now Matthews has not provided a written document pertaining to this situation as we are waiting to do an onsite inspection first. At this time I am not applying for a permit to install modification until Matthews can visit and investigate this further.

Regarding EUCREMATORY 1 and EUCREMATORY 3, I have requested Matthews to install the necessary temperature chart recorders in order to correct the cited violations. I am still waiting for confirmation on the specific date that Matthews will be onsite to complete the work. Currently we are still performing cremations with EUCREMATORY 1 and EUCREMATORY 3.

I will continue to make this a priority and will update you on our progress.

Kind Regards,

Tim Burrows
Director
Resurrection Cemetery
