SUBJECT: PM generation		
RESOLVED COMPLAINTS:		

NARRATIVE

I arrived at the 1742/1746 Springwells, Detroit address at 1000 hours. The purpose of visit was to perform a scheduled compliance inspection of the iron metal fabrication business at the site. I approached the address from Springwells northbound. I sighted the building bearing the address 1746 Springwells to the right/ east side of street. The building was closed and locked tight. The business sign on the building had been taken down. I drove to the back of building using the alley. The building was fenced tight along the alley side without a gate. The bay door behind the building leading into the alley was blocked with a truck and junk furniture. The environment showed no sign of business activities in the building and on the premises for an extended time.

DETERMINATION

The inspection concluded there has not been business activities at the property for an extended period. There was no operator at the site. The Spanish Iron no longer conducts business at this location. There are no permits associated with this facility address.
